In high medieval France men and women saw the world around them as the product of tensions between opposites Imbued with a Christian culture in which a penniless preacher was also the King of Kings and the last were expected to be first twelfth century thinkers brought order to their lives through the creation of opposing categories In a highly original work Constance Brittain Bouchard examines this poorly understood component of twelfth century thought one responsible in her view for the fundamental strangeness of that culture to modern thinking Scholars have long recognized that dialectical reasoning was the basic approach to philosophical legal and theological matters in the high Middle Ages Bouchard argues that this way of thinking and categorizing which she terms a discourse of opposites permeated all aspects of medieval thought She rejects suggestions that it was the result of imprecision and provides evidence that people of that era sought not to reconcile opposing categories but rather to maintain them Bouchard scrutinizes the medieval use of opposites in five broad areas scholasticism romance legal disputes conversion and the construction of gender Drawing on research in a series of previously unedited charters and the earliest glossa manuscripts she demonstrates that this method of constructing reality was a constitutive element of the thought of the period "*Raoul de Cambrai*": a Literary Study Elizabeth Riggs, 1965 Masters and Rebels in Raoul de Cambrai and the Cycles Des Barons Révoltés Sandra Evans, 2005 *Epic Style in Raoul de Cambrai* Helen S. Medieval society was dominated by its knights and nobles The literature created in medieval Europe was primarily a literature of knightly deeds and the modern imagination has also been captured by these leaders and warriors This book explores the nature of the nobility focusing on France in the High Middle Ages 11th 13th centuries Constance Brittain Bouchard examines their families their relationships with peasants townspeople and clerics and the images of them fashioned in medieval literary texts She incorporates throughout a consideration of noble women and the nobility's attitude toward women Research in the last two generations has modified and expanded modern understanding of who knights and nobles were how they used authority war and law and what position they held within the broader society Even the concepts of feudalism courtly love and chivalry once thought to be self evident aspects of medieval society have been seriously questioned Bouchard presents bold new interpretations of medieval literature as both reflecting and criticizing the role of the nobility and their behavior She offers the first synthesis of this scholarship in accessible form inviting general readers as well as students and professional scholars to a new understanding of aristocratic role and function **Medieval Reader** Norman F.
