The Lynching of Cleo Wright Dominic J. Capeci Jr., 2021-12-14 On January 20 1942 black oil mill worker Cleo Wright assaulted a

white woman in her home and nearly killed the first police officer who tried to arrest him. An angry mob then hauled Wright out of jail and dragged him through the streets of Sikeston, Missouri, before burning him alive. Wright's death was unfortunately not unique in American history, but what his death meant in the larger context of life in the United States in the twentieth century is an important and compelling story. After the lynching, the U.S. Justice Department was forced to become involved in civil rights concerns for the first time, provoking a national reaction to violence on the home front at a time when the country was battling for democracy in Europe. Dominic Capeci unravels the tragic story of Wright's life on several stages, showing how these acts of violence were indicative not only of racial tension but the clash of the traditional and the modern brought about by the war. Capeci draws from a wide range of archival sources and personal interviews with the participants and spectators to draw vivid portraits of Wright, his victims, law enforcement officials, and members of the lynch mob. He places Wright in the larger context of southern racial violence and shows the significance of his death in local, state, and national history during the most important crisis of the twentieth century.

Not Trauma Alone Steven Gold, 2013-08-21. How is an individual to lead a comfortable, productive existence when he or she was never taught the skills necessary for effective living? Adult survivors of child abuse often face this dilemma. Instead of being nurtured as children and taught life skills by their caregivers, child abuse survivors were subjected to a daily regimen of coercive control, contempt, rejection, and emotional unresponsiveness. It is not surprising, therefore, that many survivors encounter difficulty adjusting from this type of damaging childhood atmosphere to one in which they have autonomy. This book addresses the particular problems associated with treating adult survivors of child abuse. Until now, psychotherapy for child abuse survivors often centered on the trauma of their abuse experiences. However, survivors frequently reveal a history suggesting it was not abuse trauma alone that created their difficulties, but growing up essentially alone without the consistent emotional support and guidance needed for development.

of effective functioning This book presents an alternative to trauma focused treatment that though effective for treatment of other forms of trauma can induce deteriorated rather than improved functioning in survivors of prolonged childhood maltreatment The contextual therapy presented in Not Trauma Alone delineates a psychotherapeutic approach that emphasizes helping survivors develop the capacities for effective functioning that were never transmitted to them during their formative years Detailed descriptions of the methods and interventions comprising contextual therapy are included in this critical book for all mental health professionals clinicians academics and students in the field
