Scrolling Forward Making Sense Of Documents In The Digital Age:

Scrolling Forward David M. Levy, 2001 What's up doc Information scientist David M. Levy wants us to look at the documents that fill our lives and his book *Scrolling Forward* is a thoughtful reflection on their near omnipresence. Levy has the perfect résumé for this job: after getting his Ph.D. in Computer Science in 1981, he took off for England to pursue the study of calligraphy and bookbinding. His love of books shows in his writing, which is rich with references and anecdotes from Walt Whitman to Woody Allen. Drawing on examples as disparate as grocery store receipts, greeting cards, identity papers, and of course e-mail, Levy finds the common threads binding them together and explores how and why we use them in daily life. He looks at digitization closely, considering how speed, ease of editing, and potentially perfect copying changes our traditional considerations of documentation. Though he insists that he's looking at the present, not speculating about the future, it's hard to see how to avoid looking ahead after reading *Scrolling Forward*. Rob Lightner

Scrolling Forward, Second Edition

David M. Levy, 2016-01-05 A fascinating, insightful, and wonderfully written exploration of the document. Like Henry Petroski's *The Pencil*, David Levy's *Scrolling Forward* takes a common everyday object, the document, and illuminates what it reveals about us both in the past and in the digital age. We are surrounded daily by documents of all kinds: letters and credit card receipts, business memos and books, television images and web pages. Yet we rarely stop to reflect on their significance. Now, in this period of digital transition, our written forms as well as our reading and writing habits are being disturbed and transformed by new technologies and practices. An expert on information and written forms and a former researcher for the document pioneer Xerox, Levy masterfully navigates these concerns, offering reassurance while sharing his own excitement about many of the new kinds of emerging documents. He demonstrates how today's technologies, particularly the personal computer and the World Wide Web, are having analogous effects to past inventions such as paper, the printing press, writing implements, and typewriters in shaping how we use documents and the forms those documents take. *Scrolling Forward* lets us see the continuity between the written forms of today and those of the past. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history, books about World War II, the Third Reich, Hitler, and his henchmen, the JFK assassination conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Now, in this period of digital transition, our written forms as well as our reading and writing habits are being questioned and transformed by new technologies and practices. What is the future of the book? Is paper about to disappear? With the Internet and World Wide Web, what will happen to libraries, copyright, and education?

High-Level Subject Access Tools and Techniques in Internet Cataloging Judith Ahronheim, 2024-11-15 Is your library's portal as efficient as it could be *High Level Subject Access Tools and Techniques* explores the potential and early development of high level subject access It examines Web tools and traditionally maintained library structures that facilitate the automated relation of

resources to high level subject categories based on the descriptive metadata that already exists in traditional library records. It includes a research study of high level subject browse structures as well as hands on reports of actual projects and development activities and an examination of the environment in which demand for high level subject access arises. From the editor: As the World Wide Web and graphic user interfaces developed in the 90s libraries began to build gateways for their online resources. These gateways allowed library users to employ the browse point and click approach to resource discovery that they had come to expect from online tools. Most of these interfaces amounted to little more than hand constructed lists of links. Today many libraries offer access to users through a set list of broad topics sometimes called a high level browse display. Methods for populating these subject categories remain crude and their maintenance requires considerable resources. As a result libraries have begun to look at ways of applying traditional techniques associated with cataloging to these new interfaces. Several goals are involved in these developments. Many hope to reuse data from library catalogs and thus limit maintenance burdens. Others seek to apply a more standard set of tools and principles to the construction of portals to allow greater cooperation among institutions that want to interoperate with each other. This pathbreaking book examines vital issues in high level subject access including subject trees and their relationship to the structure inherent in Dewey Classification emerging patterns in the development of browsing services including a hierarchy of subjects that is not based in classification a map that relates data from catalog records to the subject hierarchy and tools for extracting data from a catalog and storing it in a separate database to produce a more flexible display task based as opposed to materials based subject lists the social issues that are associated with choosing categories based on the nature and activity of an institution's library users the political issues involved in selecting disciplines or topics for a browsing service. And presents fascinating case studies of Columbia University's efforts to build an automatically generated browsable display based on Library of Congress Classification as it occurs in catalog records the High Level Thesaurus Project HILT in which a group of libraries archives and museums attempted to find a common method for high level subject access via portal.

Reading and Writing the Electronic Book Catherine Marshall, 2022-06-01 Developments over the last twenty years have fueled considerable speculation about the future of the book and of reading itself This book begins with a gloss over the history of electronic books including the social and technical forces that have shaped their development The focus then shifts to reading and how we interact with what we read basic issues such as legibility annotation and navigation are examined as aspects of reading that ebooks inherit from their print legacy Because reading is fundamentally communicative I also take a closer look at the sociality of reading how we read in a group and how we share what we read Studies of reading and ebook use are integrated throughout the book but Chapter 5 goes meta to explore how a researcher might go about designing his or her own reading related studies No book about ebooks is complete without an explicit discussion of content preparation i e how the electronic book is written Hence Chapter 6 delves into the underlying representation of ebooks and efforts to create

and apply markup standards to them This chapter also examines how print genres have made the journey to digital and how some emerging digital genres might be realized as ebooks Finally Chapter 7 discusses some beyond the book functionality how can ebook platforms be transformed into portable personal libraries In the end my hope is that by the time the reader reaches the end of this book he or she will feel equipped to perform the next set of studies write the next set of articles invent new ebook functionality or simply engage in a heated argument with the stranger in seat 17C about the future of reading
