Short-Term Dynamic Psychotherapy P. E. Sifneos, 2013-12-01 Short term psychotherapy although brief is not ephemeral In the decade or two of its existence it has grown into a sturdy tree and a sign of its maturity is the fact that it is now the subject of an increasing number of overview articles summarizing its literature and findings Yet it remains a young and vigorous discipline Its pioneers have not been elevated to a pantheon of venerable but mute immortals on the contrary they are to be found at the forefront of the field actively contributing to the development of its theory and practice This volume is ample testimony to their continued creativity Dr Sifneos has lectured and written extensively about short term anxiety provoking psychotherapy STAPP Based on psychoanalytic principles STAPP aims to resolve pathological psychic conflicts and help those suffering from them to learn new ways of being in their most intimate relationships It does so by actively focusing the patients sights on their Oedipal problems and its effectiveness given a proper selection of subjects by specific criteria has been amply documented in controlled clinical studies *Short- Term Dynamic Psychotherapy* Peter E. Sifneos, 1979

Formulation in Action David Dawson, Nima Moghaddam, 2015-01-01 When people seek psychological support formulation is the theory driven methodology used by many practitioners to guide identification of the processes mechanisms and patterns of behaviour that appear to be contributing to the presenting difficulties However the process of formulating or applying psychological theory to practice can often seem unclear In this volume we present multiple demonstrations of formulation in action written by applied psychologists embedded in clinical training research and practice The volume covers a range of contemporary approaches to formulation and therapy that have not been considered in extant works and includes unique sections offering critical counter perspectives and commentaries on each approach and its application by authors working from alternative theoretical positions

Budman,Alan S. Gurman,2016-03-14 This classic work provides a richly textured overview of the whys and hows of brief therapy The authors identify the central features of effective time limited interventions for individuals couples families and groups Taking a developmental approach to treatment they explain how brief therapy can help at different times in a patient s life as changes and transitions bring on new stresses and challenges A practical framework is provided for selecting and screening patients rapidly finding a focus for clinical work and making optimal use of available time Case examples and extensive transcripts are included to illustrate the use of strategies and techniques drawn from many different psychotherapy perspectives Throughout the focus is on creative and efficient ways to help patients build on existing strengths and make desired changes in their interactions with others **Handbook of the Brief Psychotherapies** Richard A. Wells,Vincent J. Giannetti,2013-11-22 The last two decades have seen unprecedented increases in health care costs and at the same time encouraging progress in psychotherapy research On the one hand accountability cost effectiveness and efficiency have now become commonplace terms for providers of mental health services whereas on the other hand an increasingly voluminous literature has emerged supporting the effectiveness of a number of types of psychotherapies There now exists the possibility for the design and delivery of mental health services that drawing upon this literature more closely approximate empirically established data concerning the appropriateness and effectiveness of psychotherapy The Handbook of the Brief Psychotherapies is intended to capture one major thrust of this movement the development of a group of empirically grounded time limited therapies all sharing a common interest in the clinical utilization of a structured focus and an emphasis on time and action For many years professional self interest competing theoretical paradigms and the vagaries of practice wisdom and clinical myth have influenced the practice of psychotherapy A critical questioning of the resulting predominantly nondirective open ended and global therapies has led to a growing emphasis on action oriented problem focused time limited therapies Yet ironically this interest in the brief psychotherapies has not so much involved a radical departure from traditional therapeutic modalities as it has emphasized a new pragmatism about how time action and structure operate in life as well as in therapy **The Handbook of Adult Clinical Psychology** Alan Carr,Muireann McNulty,2014-03-05 The Handbook of Adult Clinical Psychology provides a reliable source of guidance on the full range of issues associated with conducting evidence based practice in adult mental health Topics covered include general frameworks for practice classification and epidemiology CBT psychodynamic systemic and bio medical models general assessment procedures mood problems depression bipolar disorder and managing suicide risk anxiety problems generalized anxiety disorder panic disorder obsessive compulsive disorder PTSD and social phobia physical health problems somatoform

disorders chronic pain adjustment to cancer eating disorders and substance abuse other psychological difficulties schizophrenia borderline personality disorder psychological problems in older adults anger management and depersonalization disorder Each chapter includes useful skill building exercises summaries of the issues covered suggested further reading lists for both psychologists and patients and case material This practical Handbook will prove invaluable to clinical psychologists in training helping them to build the necessary skills to complete a clinical placement in the field of adult mental health The Handbook of Adult Clinical Psychology is one of a set of three handbooks published by Routledge which includes The Handbook of Child and Adolescent Clinical Psychology by Alan Carr and The Handbook of Intellectual Disability and Clinical Psychology Practice Edited by Alan Carr Gary O Reilly Patricia Noonan Walsh and John McEvoy
