Shouldering The Burdens Of Defeat West Germany And The Reconstruction Of:

Shouldering the Burdens of Defeat Michael L. Hughes, 2014-06-30 World War II and its aftermath brought devastating material losses to millions of West Germans Military action destroyed homes businesses and personal possessions East European governments expelled 15 million ethnic Germans from their ancestral homes and currency reform virtually wiped out many Germans hard earned savings These war damaged individuals well over one third of the West German population vehemently demanded compensation at the expense of those who had not suffered losses to be financed through capital levies on surviving private property Michael Hughes offers the first comprehensive study of West Germany's efforts to redistribute the costs of war and defeat among its citizenry The debate over a Lastenausgleich a balancing out of burdens generated thousands of documents in which West Germans articulated deeply held beliefs about social justice economic rationality and political legitimacy Hughes uses these sources to trace important changes in German society since 1918 illuminating the process by which West Germans who had rejected liberal democracy in favor of Nazi dictatorship in the 1930s came to accept the social market economy and parliamentary democracy of the 1950s

Female Administrators of the Third Reich Rachel Century, 2017-08-10 This book compares female administrators who specifically chose to serve the Nazi cause in voluntary roles with those who took on such work as a progression of established careers Under the Nazi regime secretaries SS Helferinnen female auxiliaries for the SS and Nachrichtenhelferinnen des Heeres female auxiliaries for the army held similar jobs taking dictation answering telephones sending telegrams Yet their backgrounds and degree of commitment to Nazi ideology differed markedly The author explores their motivations and what they knew about the true nature of their work These women had access to information about the administration of the Holocaust and are a relatively untapped resource Their recollections shed light on the lives love lives and work of their superiors and the tasks that contributed to the displacement deportation and death of millions The question of how gender intersected with Nazism repression atrocity and genocide forms the conceptual thread of this book

A History of Twentieth-Century Germany Ulrich Herbert, 2019-08-15 Germany in the 20th century endured two world wars a failed democracy Hitler's dictatorship the Holocaust and a country divided for 40 years after World War II But it has also boasted a strong welfare state affluence liberalization and globalization a successful democracy and the longest period of peace in European history A History of Twentieth Century Germany provides a survey of German history during a century of extremes Ulrich Herbert sees German history in the 20th century as determined by two contradictory perspectives On one hand there are the world wars and great catastrophes that divide the country's history into two parts before and after 1945 Germany is the birthplace of radical ideologies of the left and right and the only country in which each ideology became the foundation of government This pattern left its stamp on both the first and second halves of the century On the other hand the rise of modern industrial society led to decades of conflict over the social and political order regardless of which political system was in force

Considering these contradictory developments Herbert tackles the questions of both the collapse in the first half of the century and the development from a post fascist ruined society to one of the most stable liberal democracies in the world in the latter half Herbert's analysis brings together wars and terror utopia and politics capitalism and the welfare state socialism and liberal democratic society gender and generations culture and lifestyles European integration and globalization The resulting book sets a standard by which historians of the period will be measured in the future

In the House of the Hangman Jeffrey K. Olick, 2005-09 The central question for both the victors and the vanquished of World War II was just how widely the stain of guilt would spread over Germany Political leaders and intellectuals on both sides of the conflict debated whether support for National Socialism tainted Germany's entire population and thus discredited the nation's history and culture The tremendous challenge that Allied officials and German thinkers faced as the war closed then was how to limn a postwar German identity that accounted for National Socialism without irrevocably damning the idea and character of Germany as a whole In the House of the Hangman chronicles this delicate process exploring key debates about the Nazi past and German future during the later years of World War II and its aftermath What did British and American leaders think had given rise to National Socialism and how did these beliefs shape their intentions for occupation What rhetorical and symbolic tools did Germans develop for handling the insidious legacy of Nazism Considering these and other questions Jeffrey K Olick explores the processes of accommodation and rejection that Allied plans for a new German state inspired among the German intelligentsia He also examines heated struggles over the value of Germany's institutional and political heritage Along the way he demonstrates how the moral and political vocabulary for coming to terms with National Socialism in Germany has been of enduring significance as a crucible not only of German identity but also of contemporary thinking about memory and social justice more generally Given the current war in Iraq the issues contested during Germany's abjection and reinvention how to treat a defeated enemy how to place episodes within wider historical trajectories how to distinguish varieties of

victimhood are as urgent today as they were sixty years ago and *In the House of the Hangman* offers readers an invaluable historical perspective on these critical questions

Homecomings Frank Biess, 2021-07-13 This book focuses on one of the most visible and important consequences of total defeat in postwar Germany the return to East and West Germany of the two million German soldiers and POWs who spent an extended period in Soviet captivity These former prisoners made up a unique segment of German society They were both soldiers in the war of racial annihilation on the Eastern front and then suffered extensive hardship and deprivation themselves as prisoners of war The book examines the lingering consequences of the soldiers return and explores returnees own responses to a radically changed and divided homeland Historian Frank Biess traces the origins of the postwar period to the last years of the war when ordinary Germans began to face the prospect of impending defeat He then demonstrates parallel East and West German efforts to overcome the German loss by transforming returning POWs into ideal post totalitarian or antifascist citizens By exploring returnees troubled adjustment to the more private spheres of the workplace and the family the book stresses the limitations of these East and West German attempts to move beyond the war Based on a wide array of primary and secondary sources *Homecomings* combines the political history of reconstruction with the social history of returnees and the cultural history of war memories and gender identities It unearths important structural and functional similarities between German postwar societies which remained infused with the aftereffects of unprecedented violence loss and mass death long after the war was over

After Nuremberg Robert Hutchinson, 2022-01-01 How the American High Commissioner for Germany set in motion a process that resulted in every non death row inmate walking free after the Nuremberg trials *After Nuremberg* is about the fleeting nature of American punishment for German war criminals convicted at the twelve Nuremberg trials of 1946 1949 Because of repeated American grants of clemency and parole ninety

seven of the 142 Germans convicted at the Nuremberg trials many of them major offenders regained their freedom years sometimes decades ahead of schedule High ranking Nazi plunderers kidnappers slave laborers and mass murderers all walked free by 1958 High Commissioner for Occupied Germany John J McCloy and his successors articulated a vision of impartial American justice as inspiring and legitimizing their actions as they concluded that German war criminals were entitled to all the remedies American laws offered to better their conditions and reduce their sentences Based on extensive archival research including newly declassified material this book explains how American policy makers best intentions resulted in a series of decisions from 1949 1958 that produced a self perpetuating bureaucracy of clemency and parole that rehabilitated unrepentant German abettors and perpetrators of theft slavery and murder while lending salience to the most reactionary elements in West German political discourse Bombing Civilians Yuki Tanaka, Marilyn B. Young, 2010-08-03 Bombing Civilians examines a crucial question why did military planning in the early twentieth century shift its focus from bombing military targets to bombing civilians From the British bombing of Iraq in the early 1920s to the most recent policies in Kosovo Afghanistan Iraq and Lebanon Bombing Civilians analyzes in detail the history of indiscriminate bombing examining the fundamental questions of how this theory justifying mass killing originated and why it was employed as a compelling military strategy for decades both before and since the bombing of Hiroshima and Nagasaki *Burned Bridge* Edith Sheffer, 2014 Examines Burned Bridge the intersection between two sister cities in East and West Germany and reveals how the daily adjustments of anxious residents shaped the barrier that divided them *Histories of the Aftermath* Frank Biess, Robert G. Moeller, 2010-07-01 In 1945 Europeans confronted a legacy of mass destruction and death millions of families had lost their homes and livelihoods millions of men in uniform had lost their lives and millions more had been displaced by the war's destruction and the genocidal policies of the Nazi regime From a range of methodological historical perspectives military cultural and social to film and gender and sexuality studies this volume explores how Europeans came to terms with these multiple pasts With a focus on distinctive national experiences in both Eastern and Western Europe it illuminates how postwar stabilization coexisted with persistent insecurities injuries and trauma A Nation Fermented Robert Shea Terrell, 2024 How did the beer drinking German become a fixture in the global imagination How did a provincial production standard the Reinheitsgebot or Beer Purity Law become a pillar of national consumer sentiments A Nation Fermented explores how southern German convictions shaped the culture of the nation in the twentieth century **Beyond Expropriation Without Compensation** Olaf Zenker, Cheryl Walker, Zsa-Zsa Boggenpoel, 2024-04-04 Speeding up land reform through a constitutional amendment that would explicitly permit the expropriation of land without compensation has dominated legal and political policy debates in South Africa in recent years Taking this politically and emotionally charged issue as its starting point this volume offers both expert commentary on this issue from a variety of disciplinary perspectives and also fresh ideas on how to advance the redistributive transformation that South Africa so urgently needs It brings

critically important debates around transformative property law the need for diversified land justice and the possibilities of alternative forms of redistribution into productive conversation with each other While grounded in the complex realities of South Africa's past and present the volume speaks to concerns that resonate in many contexts in the Global South and beyond It will appeal to scholars students policymakers and general readers concerned with both the theory and practice of redistributive justice This title is also available as Open Access on Cambridge Core [Safehaven](#) Martin Lorenz-Meyer, 2007 A detailed study of the development and collapse of the Safehaven Program initiated by the Federal Economic Administration advocated by Treasury Secretary Henry Morgenthau and reluctantly supported by Britain and France that focused on averting post World War II German aggression by investigating and confiscating German assets in neutral countries Provided by publisher **Restitution and Memory** Dan Diner, Gotthart Wunberg, 2007 The myriad debates on restitution and memory which have been going on in Europe for decades indicate that World War II never ended It is still very much with us paradoxically re invoked by the events of 1989 90 and the expansion of Europe to the east in the aftermath of the collapse of communism and economic globalization The growing privatization and reprivatization in Eastern Europe revive pre war memories that lay buried under the blanket of collectivization and nationalization of property after 1945 World War II did not only result in the death and destruction on a large scale but also in an a far reaching revolution of existing property relations This volume offers an assessment of the problematic of restitution and its close interconnection with the discourses of memory that have recently emerged *War of Extermination* Hannes Heer, Klaus Naumann, 2004-11 This volume contains the most important contributions by distinguished historians who have thoroughly demolished this Wehrmacht myth The picture that emerges from this collection is a depressing one and raises many questions about why ordinary men got involved as perpetrators and bystanders in an unprecedented program of extermination of racially inferior men women and children in Eastern Europe and the Soviet Union during the Second World War Pub desc **A History of Political Conflict** Julia Cagé, Professor of Economics Julia Cagé, Thomas Piketty, 2025-08-26 Drawing on centuries of data Julia Cagé and Thomas Piketty place today's French politics in historical context France is divided among bourgeois and distinct urban and rural working class blocs historically an unstable structure The authors show how inequality breeds tripartite competition and argue for the greater potential of two way rivalry
