Corpus Approaches to Evaluation Susan Hunston, 2010-10-04 This book applies a set of corpus investigation techniques to the study of evaluation or stance or affect in naturally occurring discourse Evaluative language indicates opinions attitudes and judgments It is an important part of activities such as persuading someone that a particular viewpoint is correct or in constructing knowledge from a different number of theories This book argues that phraseology regularities or patterns in language identifiable from corpus studies is important to the study of evaluative language It makes a number of more specific arguments that modal meaning is expressed through particular phrases and not only through modal verbs that figurative phrases are used to intensify evaluation and that patterns of use may be exploited to achieve an automatic identification of evaluations It also builds on the author's previous work in exploring how films and journalism use language and images to build knowledge from ideas
