*Les Contes D'Hoffmann* Jacques Offenbach, 1882

Early Relational Trauma and the Development of the Self Tomás Casado-Frankel, María Eugenia Herrero, 2022-06-01 Through the attentive examination of a single case study this book weaves together the lived experiences of a clinician in training with those of their teenage patient as they collectively navigate and overcome the profound effects of early relational trauma on the development of the self By the care taken in their analysis the book's authors deepen readers' understanding of attachment disorders and their clinical presentation whilst allowing for a uniquely human view of the interactions between patient and clinician Elegantly combining poetic prose with a clinical account this book invites readers to travel with the clinician to think and feel in tandem with his subjective experiences and to explore psychoanalytic and systems theory as a means to understand clinical relationships that are seldom written about with such vulnerability It is a story of determination and growth both moving and enlightening By giving form to the resilience of both patient and clinician their mutual strength through tears of change this book expounds the behavioral consequences and treatment of psychopathologies associated with early relational trauma In this way the book will prove essential for all psychoanalysts and psychotherapists working with traumatized children and adolescents

*If You Love Me, Don't Love Me* Mony Elkaim, 1997 This work presents clinical examples to reveal a fresh understanding of the therapist's feelings within the content of treatment At the heart of Elkaim's technique is self-reference He demonstrates how therapists can use their own experiences as powerful tools of intervention Elkaim also shows how to work with crippling reciprocal double binds when for example someone wants to be loved but pushes his loved ones away out of fear that love is followed by loss The book should be of use to anyone who works with couples or families

### **An Algebraic Introduction to Complex Projective Geometry**

Christian Peskine,1843 In this introduction to commutative algebra the author choses a route that leads the reader through the essential ideas without getting embroiled in technicalities He takes the reader quickly to the fundamentals of complex projective geometry requiring only a basic knowledge of linear and multilinear algebra and some elementary group theory The author divides the book into three parts In the first he develops the general theory of noetherian rings and modules He includes a certain amount of homological algebra and he emphasizes rings and modules of fractions as preparation for working with sheaves In the second part he discusses polynomial rings in several variables with coefficients in the field of complex numbers After Noether s normalization lemma and Hilbert s Nullstellensatz the author introduces affine complex schemes and their morphisms he then proves Zariski s main theorem and Chevalley s semi continuity theorem Finally the author s detailed study of Weil and Cartier divisors provides a solid background for modern intersection theory This is an excellent textbook for those who seek an efficient and rapid introduction to the geometric applications of commutative algebra

Unconsciousness Between Phenomenology and Psychoanalysis Dorothee Legrand,Dylan Trigg,2017-05-18 This book contains a series of essays that explore the concept of unconsciousness as it is situated between phenomenology and psychoanalysis A leading goal of the collection is to carve out phenomenological dimensions within psychoanalysis and equally to carve out psychoanalytical dimensions within phenomenology The book examines the nature of unconsciousness and the role it plays in structuring our sense of self It also looks at the extent to which the unconscious marks the body as it

functions outside of experience as well as manifests itself in experience In addition the book explores the relationship between unconsciousness and language particularly if unconsciousness exists prior to language or if the concept can only be understood through speech The collection includes contributions from leading scholars each of whom grounds their investigations in a nuanced mastery of the traditional voices of their fields These contributors provide diverse viewpoints that challenge both the phenomenological and psychoanalytical traditions in their relation to unconsciousness
