Formation Attacks Joel Johnson,2010 As a Chess Master who has spent many years playing aggressive and attacking chess I was quite dismayed during a recent visit to my local bookstore I was in search of a book that covered an array of attacks against many Pawn formations in an organized fashion Needless to say my search came up empty The books on attacking fell short in many ways Many of the books were simply a small collection of attack games with no instruction about the art of attacking or about the skills required to become a great attacker None of them provided the reader with any reference information about attacking or the weaknesses of various Pawn formations None of them contained games with

attacking themes like the Traxler Variation of the Two Knight's Defense and the Jack Young Fishing Pole. None of them contained any wild attacking ideas that can stream from opening gambits such as the Blackmar Diemer Gambit, King's Gambit, Scotch Gambit, Nakhmanson Gambit etc. 500 pages, 435 games, Figurine Chess Notation. *The Carlsen Variation - A New Anti-Sicilian* Carsten Hansen, 2020. Rattle your opponents from the get go. How do you change the Sicilian Defense in your favor? The Sicilian Defense 1 e4 c5 contains countless variations and sub variations that have been discussed in detail at all levels of play for many years. Even small specialized systems have been covered in exhaustive detail in book after book. That is why this book is unique. The Carlsen Variation which arises after 1 e4 c5 2 Nc3 d6 3 d4 cxd4 4 Qxd4 has never previously been covered in detail before. The variation was uncorked by World Champion Magnus Carlsen in 2018 and has since been played by several other top grandmasters such as Fabiano Caruana, Hikaru Nakamura and several others. Yet despite this attention the theory of the variation is largely unexplored and this book aims to set this discrepancy straight. Main lines are established and carefully analyzed with hundreds of new ideas and improvements suggested along the way. For the reader this book is an excellent resource to get the opponent out of their opponent's book into our book. Time to have some fun in the Sicilian. Enjoy. Catastrophes & Tactics in the Chess Opening - Volume 7: Minor Semi-Open Games Carsten Hansen, 2018-02-23. WINNING FAST IS FUN. This book is a collection of games played by the best players in the world in which either White or Black wins in 15 moves or less either a result of brilliant chess tactics, an accumulation of mistakes or blunders. Through the study of the games in this volume you will improve your Opening play, Opening repertoire, Tactical vision, Tactical ability. The chess opening variations in this volume are all the variations of the minor Semi Open Games such as 1 The Pirc Defence, 2 Modern Defenses, 2 The King's Fianchetto, 3 The Alekhine Defense, 4 The Scandinavian Defense, 5 Owen's Defense, Nimzowitsch Defense. Short games in chess have always fascinated me. What is it that is causing a player to go so wrong that he or she loses within 15 moves or 25 moves as in my Chess Miniatures Series? The games in this book illustrate the making of and punishment of a lot of typical mistakes: Loose pawns/pieces, Not calculating far enough, Overburdened pieces, Overlooked intermediary moves, Miscalculations, Not sensing danger. And much more of that kind. But the names also include a surprising amount of tactics. See the front cover. White to move, sometimes even missed tactical opportunities. I have chosen only from games of players that were rated 2350 and above or would have rated as such but it was before the rating system was put in place because I felt that if mistakes like these can be played by such strong players then there are lessons to be learned for the majority of the rest of us. Further I sorted away the worst games such as when one side a piece is threatened and the other side forgets to move a threatened piece even that happens among strong players. Through the study of the games in this book should help you avoid a lot of mistakes in your own games, help you to take advantage of the mistakes of your opponents and ultimately sharpen your tactics and tactical awareness by answering the prompts to the diagrammed positions. Enjoy.
