Burian,2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect's agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement

Arquitecturas Neocoloniales Francisco Ramírez Potes,2018-07-05 En los años 30 en Cali empezó una verdadera carrera urbanizadora más allá de sus viejos límites al tiempo que se realizaban una serie de obras importantes para la celebración de sus cuatrocientos años El tratado de nuevas avenidas la construcción de un bosque municipal la configuración definitiva de los espacios alrededor del río la arborización de las calles la construcción de monumentos la restauración de la Torre Mudjar la construcción de escuelas hospicios etc fueron entre muchas las tareas adelantadas o al menos propuestas en 1936 La arquitectura residencial y de muchos edificios públicos obedeció a un gusto que se inclinó por algunas premisas funcionales modernas en la organización no tipológica de los espacios compositivos como la descomposición del volumen urbanas casas aisladas en medio de jardines y técnicas de la arquitectura moderna pero incorporando techos de teja columnas y dinteles en piedra arcadas balcones y porches cuidadosa cerrajería elaborada carpintería acabados rugosos en paredes etc Para muchos la arquitectura residencial de estos años y el urbanismo que lo acompañó constituyó la más amable imagen de la ciudad pues fueron sensibles a la topografía al paisaje y el clima de Cali cuando los barrios incluyeron calles arborizadas patios y antejardines y el trazado vial según los caprichos de la geografía La demanda de este tipo de arquitectura y su relación con la naturaleza fue tan intensa que se mantuvo hasta bien entrados los años 50 obligando incluso a los más radicales promotores de la arquitectura moderna a realizar proyectos de este tipo En Cali todas estas arquitecturas suelen ser conocidas hoy como estilo español californiano una de las versiones del amplio movimiento que constituyeron las arquitecturas neocoloniales que se manifestaron con variaciones formales distintas referencias desde Argentina y Chile hasta California y Florida en Estados Unidos Verdadera alternativa al eclecticismo académico europeo nacida de un espíritu americanista que recorrió toda

Latinoamérica rica las arquitecturas neocoloniales fueron un campo de creación intenso de interpretación de las peculiaridades regionales culturales y materiales técnicas y ambientales y durante un muy buen tiempo trascendieron su contexto de origen y se convirtieron en una opción distinta a la arquitectura internacionalista del Movimiento Moderno pues respondían a expectativas de tipo cultural regional a las que en un principio no proveían respuestas *Caribbean Modernist Architecture* Gustavo Luis Moré, 2010 In February and March 2008 the International Program and the Department of Architecture and Design at The Museum of Modern Art organised the Museum's first symposium on the modernist architecture of the Caribbean and bordering Latin American countries in collaboration with the Caribbean School of Architecture at the University of Technology Kingston Jamaica The goal was to encourage scholarly curatorial and broader educational awareness Topics covered included regional and international legacies preservation environmental sustainability and urban planning as they relate to modernist architectural history and contemporary practice The presenters were leading architects and architectural historians from the region and attendees included their colleagues as well as local and international university students policy makers civic leaders and developers from Jamaica the surrounding Caribbean islands and the United States This illustrated volume co published by MoMA and Archivos de Arquitectura Antillana AAA an architectural journal based in the Dominican Republic presents the papers from this critical symposium in both English and Spanish making them accessible to a broader public
