There are few forms in which so much authority has been invested with so little reflection as the sentence Though a fundamental unit of discourse it has rarely been an explicit object of inquiry often taking a back seat to concepts such as the word trope line or stanza To understand what is at stake in thinking or not thinking about the sentence Jan Mieszkowski looks at the difficulties confronting nineteenth and twentieth century authors when they try to explain what a sentence is and what it can do From Romantic debates about the power of the stand alone sentence to the realist obsession with precision and revision to modernist experiments with ungovernable forms Mieszkowski explores the hidden allegiances behind our ever changing stylistic ideals By showing how an investment in superior writing has always been an ethical and a political as well as an aesthetic commitment Crises of the Sentence offers a new perspective on our love hate relationship with this fundamental compositional category **The Cambridge Guide to Pedagogy and Practice in Second Language**

Distributing News Via Weblog - a Linguistic Analysis of the Guardian Newsblog Ulrike Michels, 2006-06-07 Inhaltsangabe Abstract This study investigates in how far the news language of weblogs differs from the news language in traditional print or online newspapers A special focal point is set on oral language and its functions The analysis should help to answer the questions Can weblogs help to minimize the distance between journalists and readers Can weblogs assist in attracting a new kind of readership Can weblogs assist in raising readership loyalty All results can also be transferred from journalism to public relations and marketing Can weblogs help to provide you closer insight into your customer needs Can weblogs assist in attracting new target groups Can weblogs assist in raising customer loyalty The study is set up according to the following sequence Firstly a general approach to weblogs is presented describing their structure development and implementation Secondly differences between the spoken and written mode are outlined and several models depicting the continuum relationship between both are introduced After the explanation of the significance and function of orality in written electronic and news discourse the concept of oral models in the press is introduced In a last step a sample analysis of several articles from one journalistic weblog is conducted one online and one traditional newspaper applying a linguistic framework based on the theoretical works presented before With this examination it is shown that the language used in journalistic weblogs

contains more characteristics from the variety of spoken language than the languages of online and traditional print newspapers. From the results, potential effects are derived e.g. on the practical fields of application or on the composition of the readership. Until now, only 38% of all adult US internet users and 37% of the Germans know what a weblog or short blog is. But nevertheless, weblogs have already attracted great attention from around the globe during the past nine years since their first appearance. In September 2004, Time asked: Is this a media revolution? Initially, bloggers pointed their readers to interesting sites they found on their travels in the World Wide Web. Later, this filter function was used primarily to comment and criticize media coverage of news. Thus, bloggers were claimed to be the antithesis of traditional journalists: unedited, unabashedly opinionated, sporadic and personal. This personal aspect was

Authoritative review of this dynamic field placed in an interdisciplinary context. Over 100 articles by leaders in the field. Compact and affordable single volume format.

Language material in grammars and dictionaries: Authentic or thematically related? Sina Bröcker, 2007-04-16. Seminar paper from the year 2003 in the subject English Language and Literature Studies. Linguistics grade 2. University of Rostock. Institut für Sprachwissenschaft. course Hauptseminar Corpus dictionaries and lexical structure language English. abstract: The first dictionary was published in 1984. At that time, the focus lay on lexicography, especially on English as an international language. Nowadays, nearly every three months new dictionaries appear. They are mainly published from publishing houses in Great Britain. This is due to the dominance which British lexicography won in the 1960s. When the first Longman Dictionary of Contemporary English appeared in 1978, British lexicography had finally won dominance to American lexicography. In 1987, the second edition of the Longman Dictionary of Contemporary English and the Collins COBUILD Dictionary of the English language appeared. These works were completely different to the ones before. According to Sidney I. Landau, these works were in many respects a daring departure from the customary practices of lexicography and particularly of ESL lexicography. They offered a new look at what the user needed. The aim of this paper is to take a closer look on these dictionaries to check whether they are working with authentic language material to explain words and how easy or difficult it is for a user to understand the explained issues. In grammars, the different features of a language are considered systematically. Spoken and written language material is described. Nowadays, the grammarians are working together with Universities or at least base their entries on large databases that include millions of

texts taken out of various forms of writing and communication situations This system is meant to help to provide the use of authentic language material that is familiar to the grammar user In the analysed grammars invented examples are avoided with the aim to offer the user a better access to the explained issue The aim of this paper is to analyse the used example solutions by keeping an eye on whether they are really authentic and easy to understand or not better than the invented ones that were often used in former times
