The Wild Trees Richard Preston,2008-02-12 Hidden away in foggy uncharted rain forest valleys in Northern California are the largest and tallest organisms the world has ever sustained the coast redwood trees Sequoia sempervirens Ninety six percent of the ancient redwood forests have been destroyed by logging but the untouched fragments that remain are among the great wonders of nature The biggest redwoods have trunks up to thirty feet wide and can rise more than thirty five stories above the ground forming cathedral like structures in the air Until recently redwoods were thought to be virtually impossible to ascend and the canopy at the tops of these majestic trees was undiscovered In The Wild Trees Richard Preston unfolds the spellbinding story of Steve Sillett Marie Antoine and the tiny group of daring botanists and amateur naturalists that found a lost world above California a world that is dangerous hauntingly beautiful and unexplored The canopy voyagers are young just college students when they start their quest and they share a passion for these trees persevering in spite of sometimes crushing personal obstacles and failings They take big risks they ignore common wisdom such as the notion that there s nothing left to discover in North America and they even make love in hammocks stretched between branches three hundred feet in the air The deep redwood canopy is a vertical Eden filled with mosses lichens spotted salamanders hanging gardens of ferns and thickets of huckleberry bushes all growing out of massive trunk systems that have fused and formed flying buttresses sometimes carved into blackened chambers hollowed out by fire called fire caves Thick layers of soil sitting on limbs harbor animal and plant life that is unknown to science Humans move through the deep canopy suspended on ropes far

out of sight of the ground knowing that the price of a small mistake can be a plunge to one's death Preston's account of this amazing world by turns terrifying moving and fascinating is an adventure story told in novelistic detail by a master of nonfiction narrative The author shares his protagonist's passion for tall trees and he mastered the techniques of tall tree climbing to tell the story in *The Wild Trees* the story of the fate of the world's most splendid forests and of the imperiled biosphere itself
