Trinity and Organism James Eglinton,2012-03-29 This book explores the organic motif found throughout the writings of the Dutch Calvinist theologian Herman Bavinck 1854 1921 Noting that Bavinck uses this motif at key points in the most important loci of theology Christology general and special revelation ecclesiology and so forth it seems that one cannot read him carefully without particular attention to his motif of choice the organic By examining the sense in which Bavinck views all of reality as a beautiful balance of unity in diversity James Eglinton draws the reader to Bavinck s constant concern for the doctrine of God as Trinity If God is the Father the Son and the Holy Spirit Bavinck argues the creation must be more akin to an organism than a machine Trinity and organism are thus closely linked concepts Eglinton critiques and rejects the two Bavincks one orthodox and the other modern hermeneutic so commonplace in discussions of Bavinck s theology Instead this book argues for a reunited Herman Bavinck as a figure committed to the participation of historic orthodox theology in the modern world **Life, Organisms, and Human Nature** Luca Corti,Johannes-Georg Schüle,2023-11-09 This collection of

Catalog of Books* ,1996 **The Crucible of Religion** Wojciech Maria Zalewski,2012-02-13 Religion is commonly viewed through the lens of the world's religious traditions stressing the differences and often the conflicts among them The author of this book instead presents religion as a common and universal human phenomenon based deeply in a human nature shared by all In this view the underlining and unifying principle of religion is a particular affirmative attitude toward life which he presents as the Ultimate Value and as such the key cultural constituent and defining factor of all religion This Ultimate Value finds its expressions in various civilizations and results in a variety of forms these are what we know as the world's religious traditions By analyzing the roles of both culture and civilization in their attitudes toward life the author places religion beyond religious traditions and shows how the latter regardless of whether they are theistic or atheistic draw their principles from the former mainly by promoting the Golden Rule in its applications **Chambers's Encyclopædia** ,1888
