Looking At Great Britain Looking At Other Countries:

A comparison of the defense acquisition systems of France, Great Britain, Germany and the United States ,

The International Social Survey Programme 1984-2009 Max Haller, Roger Jowell, Tom W Smith, 2009-09-11 The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically sophisticated mass attitude surveys across the globe Starting in 1984 with five nations it now encompasses forty five nations spread over five continents each administering an identical annual survey to a random sample of their population Analyses of the data or descriptions of the methodology already appear in over 3 000 publications This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents nations and over time Subjects range from inequality and the role of the state ethnic national and global identities the changing relevance of religion beliefs and practices gender roles family values and work orientations household and society Some chapters focus on methodological issues others focus on substantive findings This book sets new standards for cross cultural research

Committee, 2011-10-25 The Government must start thinking strategically about energy security to protect the UK's energy supply against short term shocks and rising global energy prices according to a report by MPs on the Energy and Climate Change Committee Gas storage capacity needs to be increased in the UK to minimise the potential damage from supply interruptions or price spikes the report argues It reveals that the UK's current storage capacity amounts to only 14 days worth of gas supply a dangerously low level compared with France which has 87 days worth of gas storage Germany 69 and Italy 59 19 gigawatts GW of ageing electricity plant will close by 2018 and the UK will become increasingly reliant on energy imports as North Sea oil and gas reserves decline The report concludes that new electricity generation currently being built or planned will fill this gap But it urges the Government to ensure security of supply by delivering on its energy efficiency targets rolling out smart meters that can balance demand and maintaining a diverse energy mix **Alcohol** Great Britain.

Economy A. González Enciso, 2016-10-04 War Power and the Economy contains a comparative history of Great Britain France and Spain the three rival empires of the 1700s It explores how the states prepared for war what kind of economic means they had what institutional changes they implemented and how efficient this was As such the book presents the first comparative synthesis aiming to understand the outcome of the global confrontation in the eighteenth century Faced with the challenge of

paying for new and more costly wars some countries found flexible ways to get more money and better supplies whereas others did not The development of freer colonial markets the increase of consumption and its taxation the problems of venal administration or the different systems of patronage with contractors are some of the factors explaining the divergences that were made clear by 1815 This book explores political and economic dimensions of the eighteenth century European state in order to explain why and how changes in power as an outcome of war depended upon the available means and the way they were obtained and used The book takes the idea that making war or preparing for it obliged governments to make important changes in their institutions so that during the eighteenth century the state in many ways formed itself through war efforts Ultimately this study aims to show how closely political and military success was entwined with economic interests This volume is of great interest to those who study economic history political economy and European history
