Loving Nature Ecological Integrity And Christian Responsibility:

Loving Nature James A. Nash,1991 The ecological crisis is a serious challenge to Christian theology and ethics because the crisis is rooted partly in flawed convictions about the rights and powers of humankind in relation to the rest of the natural world James A Nash argues that Christianity can draw on a rich theological and ethical tradition with which to confront this challenge

Christianity and Ecological Theology E. M. Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa

Happiness and the Christian Moral Life Paul J. Wadell,2012-02-16 Happiness and the Christian Moral Life introduces students to Christian Ethics looking at ethics as a path to the good life and happiness rather than a strict set of rules or regulations Revised and updated throughout the second edition maintains the book s distinctive focus on happiness Each chapter now features a list of suggested readings to point students and instructors towards further resources Other changes to the second edition include a more fully developed account of Augustine s understanding of happiness new discussions of how technology shapes relationships and happiness and consideration of the relationship between the natural law and the virtues

The Ethics of Nature Celia Deane-Drummond,2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity s treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science

Political Theology of Nature Peter Scott,2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ s resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal

political resource Christianity offers for an ecological age **The Forest and the EcoGothic** Elizabeth Parker,2020-02-13 This book offers the first full length study on the pervasive archetype of The Gothic Forest in Western culture The idea of the forest as deep dark and dangerous has an extensive history and continues to resonate throughout contemporary popular culture The Forest and the EcoGothic examines both why we fear the forest and how exactly these fears manifest in our stories It draws on and furthers the nascent field of the ecoGothic which seeks to explore the intersections between ecocriticism and Gothic studies In the age of the Anthropocene this work importantly interrogates our relationship to and understandings of the more than human world This work introduces the trope of the Gothic forest as well as important critical contexts for its discussion and examines the three main ways in which this trope manifests as a living animated threat as a traditional habitat for monsters and as a dangerous site for human settlement This book will appeal to students and scholars with interests in horror and the Gothic ecohorror and the ecoGothic environmentalism ecocriticism and popular culture more broadly The accessibility of the subject of The Deep Dark Woods coupled with increasingly mainstream interests in interactions between humanity and nature means this work will also be of keen interest to the general public

Celebrating Nature by Faith H. Paul Santmire,2020-09-09 Sometimes it is helpful to take one step backward in order to take two steps forward In this insightful volume H Paul Santmire draws on his long standing and widely recognized engagement with ecological theology to propose that the traditions of the Protestant Reformation rightly read offer rich resources today for those who are struggling to move forward to respond theologically to the crisis of a planet in peril and thereby to celebrate nature by faith *A Reenchanted World* James William Gibson,2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again For more than two centuries Western cultures as they became ever more industrialized increasingly regarded the natural world as little more than a collection of useful raw resources The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets In the famous lament of Max Weber our surroundings became disenchanted with nature s magic swept away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in Love, Technology and Theology Scott A. Midson,2020-06-25 This volume explores love in the context of today s technologies It is difficult to separate love from romanticist ideals of authenticity intimacy and depth of relationship These ideals resonate with theological models of love that highlight the way God benevolently created the world and continues to love it Technologies

which are designed in response to our desires do not necessarily enjoy this romanticist resonance and yet they are now remodelling the world Are technologies then antithetical to love In this volume leading theologians have brought together themes of theology technology and love for the first time exploring different areas where notions of love and technology are problematized In a world where algorithms and artificial intelligences interact with us and shape our lives in ever more intricate and even intimate ways we might feel attachments to and through machines that suggest sentiments of love while also changing how we think about love Does love always have to be reciprocal How can we enact love and care for others with technologies Whose desires do technologies serve consumers corporations creatures This volume offers a systematic review of the challenges of living in a technologically saturated world by means of critical application of as well as reflection on theological discussions about love
