

Lucky 13

Out of the blood-spattered sky they swooped and circled and preyed on one another until only a very few remained. Hugh Constant Godefroy was one of the "Lucky 13."

When Canada followed Britain with its declaration of war in 1940, Hugh Godefroy was filled with pride. That pride was turned to fury when Hitler retaliated by sinking the defenseless oceanliner *Athenia*; Hugh's girlfriend, Peggy Hodge, was on board. Hugh, an engineering student at the University of Toronto, signed up for duty that very day and went on to become a member of the RCAF and a wing commander.

The thrill and danger of aerial combat against the German Luftwaffe is vividly recounted. As a fighter pilot he sought out German pilots over the sea and duelled them to the death, becoming one of the most decorated flyers in Canada's history. As a young man he found romance and love, becoming both husband and father during the dramatic days of the Second World War. As drama, *Lucky 13* is absorbing, as a close-up record of World War II's air war it is invaluable.

Praise for *Lucky 13*

"This fighter pilot's story . . . is redolent with the pungence of glycol and gunpowder. . . . a superb wartime autobiography laced with wit, drama and sex. The book is alive with the adrenalin of air battles." Ron Lowman, *The Toronto Star*

"... years have passed since the end of the Second World War but the stories of heroism and horror that emerge in *Lucky 13* have lost none of their impact." *Ottawa Citizen*

"From first to last the book tells how the war looked through Canadian eyes . . . it is an exciting story, an authentic record,

P. MacKenzie,2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in Flying against Fate a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II Mining a wealth of documents as well as a trove of published and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers superstitions assumed from jinxes

to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers Flying against Fate expands our understanding of a major aspect of the psychology of war in the air and of World War II

World War II Battles Reconsidered Mark Thompson, 2025-03-19 Written by a former Harvard professor of decision science and game theory this book presents original insights on the strategies and tactics undertaken in four major battles of the Second World War That the fighting at Gazala in Libya in the late spring of 1942 constituted what has been called probably the most spectacular series of victories ever gained over a British army was in part due to its having violated the game theoretic Zero Sum Maxim of Napoleon Do not do what your enemy wishes you to The sensational British reversal of that disaster later that year at El Alamein in Egypt derived largely from heeding the millennia old military priority of command unity which has been analyzed and re endorsed by modern decision science This discipline has also judged the somewhat disappointing victory of the Allies at Falaise in France in August of 1944 to have resulted from excessive risk aversion possibly induced by three different types of fatigue One month later the Allied setback at Arnhem in the Netherlands called into question from the perspective of game theory the value of battlefield surprise These decisions approached from an

expert perspective on game theory and presented with high quality maps are presented in this pioneering application of decision science to the battles of World War II *Simon and Schuster Crossword Puzzle Book* John M. Samson,2006-05-30
