**Magical Epistemologies** Anannya Dasgupta, 2021-07-22 This book began with a simple question when readers such as us encounter the term magic or figures of magicians in early modern texts dramatic or otherwise how do we read them In the twenty first century we have recourse to an array of genres and vocabulary from magical realism to fantasy fiction that does not however work to read a historical figure like John Dee or a fictional one he inspired in Shakespeare's Prospero Between longings to transcend human limitation and the actual work of producing translating and organizing knowledge figures such as Dee invite us to re-examine our ways of reading magic only as metaphor If not metaphor then what else As we parse the term magic it reveals a rich context of use that connects various aspects of social cultural religious economic legal and medical lives of the early moderns Magic makes its presence felt not only as a form of knowledge but in methods of knowing in the Renaissance The arc of dramatists and texts that this book draws between Doctor Faustus The Tempest The Alchemist and Comus A Masque at Ludlow Castle offers a sustained examination of the epistemologies of magic in the context of early modern knowledge formation Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

**Everything That Burns** Gita Trelease, 2021-02-02 Gita Trelease's Everything That Burns is the transporting sequel to All That Glitters hailed by NPR as a soaring success Camille Durbonne gambled everything she had to keep herself and her sister safe But as the people of Paris starve and mobs riot safety may no longer be possible Not when Camille lives for the rebellion In the pamphlets she prints she tells the stories of girls living at society's margins But as her writings captivate the public she begins to suspect a dark magic she can't control lies at the heart of her success Then Louis XVI declares magic a crime and all magicians traitors to France As bonfires incinerate enchanted books and special police prowl the city the time for magic and those who work it is running out In this new Paris where allegiances shift and violence erupts the answers Camille seeks set her on a perilous path one that may cost her the boy she loves even her life If she can discover who she truly is before vengeful forces unmask her she may still win this deadly game of revolution

Staff Notes St. Louis Public Library, 1916 **Medical Meddlers Mediums & Magician** Keith Souter, 2011-11-30 The Victorians had a thirst for knowledge This drove them to explore the uncharted corners of the world plumb the unfathomable depths of science discover evolution and create some of the engineering and architectural marvels of the world Yet this open mindedness also at times made them utterly gullible Because of their closeness to disease and the ever present threat of their own mortality it was inevitable that they would be open to the claims of quacks who promised all kinds of panaceas and to mediums who offered a means of communicating with the dead So too did it make them eager for diversion and entertainment by the conjurers and illusionists of the great music halls Strangely it was through the magic making skill of the conjurers that the activities of many of the tricksters and fraudulent mediums finally came to be exposed Medical Meddlers Mediums Magicians is a box of delights for all students of Victoriana

*Making Pagans* John Kuhn,2024-12-10 How early modern theatrical practice helped construct the category of pagan as a tool of European self definition and colonial ambition In Making Pagans John Kuhn argues that drama played a powerful role in the articulation of religious difference in the seventeenth century Tracing connections between the history of stagecraft and ethnological disciplines such as ethnography antiquarianism and early comparative religious writing Kuhn shows how early modern repertory systems that leaned heavily on thrift and reuse produced an enduring theatrical vocabulary for understanding religious difference through the representation of paganism a key term in the new taxonomy of world religions emerging at this time and a frequent subject and motif in English drama of the era Combining properties such as triumphal chariots trick altars and moving statues with music special effects and other elements the spectacular set pieces that were mostly developed for plays set in antiquity depicting England s pre Christian past were frequently repurposed in new plays in representations of Native Americans and Africans in colonial contact zones Kuhn argues that the recycling of these set pieces encouraged audiences to process new cultural sites through the lens of old performance tropes and helped produce fictitious

quasi ethnographic knowledge for spectators generating the idea of a homogeneous trans historical trans geographical paganism Examining the common scenes of pagan ritual that filled England s seventeenth century stages magical conjurations oracular prophecies barbaric triumphal parades and group suicides Kuhn traces these tropes across dozens of plays from a range of authors including Ben Jonson Christopher Marlowe John Dryden and Philip Massinger Drawing together theater history Atlantic studies and the history of comparative religion Making Pagans reconceptualizes the material and iterative practices of the theater as central to the construction of radical religious difference in early modernity and of the category of paganism as a tool of European self definition and colonial ambition Psychology, Law, and Criminal Justice Graham Davies,Sally Lloyd-Bostock,Mary McMurran,Clare Wilson,2011-06-15 No detailed description available for Psychology Law and Criminal Justice The Psychology of Magic and the Magic of Psychology Amir Raz,Jay A. Olson,Gustav Kuhn,2016-11-18 Magicians have dazzled audiences for many centuries however few researchers have studied how let alone why most tricks work The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions misdirection of attention and the appearance of mind control and nuanced persuasion Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic the neural correlates of such phenomena Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts the history of magic reveals that scientific discovery often charts new territories for magicians In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic On the one hand magic can inform psychology with particular benefits for the cognitive social developmental and transcultural components of behavioural science Magicians have a large and robust set of effects that most researchers rarely exploit Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour For example magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make Moreover magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab based settings Examining how magicians consistently influence spectators for example can elucidate important aspects in the study of persuasion trust decision making and even processes spanning authorship and agency Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician On the other hand psychological science can advance the art of magic The psychology of deception a relatively understudied field explores the intentional creation of false beliefs and how people often go wrong Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities perceptual logical emotional and temporal becomes all the more revealing when top down influences including expectation symbolic thinking and framing join the fray Over the years science has permitted magicians to concoct increasingly effective routines and to elicit

heightened feelings of wonder from audiences Furthermore on occasion science leads to the creation of novel effects or the refinement of existing ones based on systematic methods For example by simulating a specific card routine using a series of computer stimuli researchers have decomposed the effect and reconstructed it into a more effective routine Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention Behavioural scientists measure and study these factors By combining analytical findings with performer intuitions psychological science begets effective magic Whereas science strives on parsimony and independent replication of results magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception The Ordinary Jim

Grimsley,2005-10-01 The Ordinary is a powerful and entrancing tale of magic science and the mysterious truth that binds them together Jim Grimsley s novels and short stories have been favorably compared to the works of Samuel R Delany Jack Vance and Ursula K Le Guin Now he unleashes an ambitious and audacious collision between science and magic The Twil Gate links two very different realms On one side of the portal is Senal an advanced technological civilization of some thirty billion inhabitants all cybernetically linked and at war with machine intelligences many light years away On the other side is Irion a land of myth and legend where the world is flat and mighty wizards once ruled Jedda Martele is a linguist and trader from Senal Although fascinated by the languages and cultures of Irion she shares her people s assumption that Irion is backward and superstitious and no match for her homeland s superior numbers and technology But as the two realms march inevitably toward war Jedda finds herself at the center of historic unimaginable events that will challenge everything she has ever believed about the world and herself At the Publisher s request this title is being sold without Digital Rights
