**Magnetic Resonance Imaging** Marinus T. Vlaardingerbroek,Jaques A. den Boer,2013-06-29 When retired it is a blessing if one has not become too tired by the strain of one's professional career In the case of our retired engineer and scientist Rinus Vlaardingerbroek however this is not only a blessing for him personally but also a blessing for us in the field of Magnetic Resonance Imaging as he has chosen the theory of MRI to be the work out exercise to keep himself in intellectual top condition An exercise which has worked out very well and which has resulted in the consolidated and accessible form of the work of reference now in front of you This work has become all the more lively and alive by illustrations with live images which have been added and analysed by clinical scientist Jacques den Boer We at Philips Medical Systems feel proud of our comakership with the authors in their writing of this book It demonstrates the value we share with them which is to achieve clinical superiority in MRI by quality and imagination During their careers Rinus Vlaardingerbroek and Jacques den Boer have made many contributions to the superiority of Philips MRI Systems They have now bestowed us with a treasure offering benefits to the MRI community at large and thereby to health care in general a much needed non diffuse textbook to help further advance the diffusion of MRI Freek Knoet Director of Magnetic Resonance Philips Medical Systems Preface Alles sollte so einfach wie möglich gemacht werden aber nicht einfacher

Fluorine Magnetic Resonance Imaging  
Eric T. Ahrens,Ulrich Flögel,2024-10-11 Image based biomarkers that report on specific cell phenotypes in the body are highly valued for disease detection and monitoring cytotherapies Towards this need there is sustained scientific interest in fluorine 19 19F magnetic resonance imaging MRI for in vivo molecular cellular imaging applications The attraction of 19F tracer MRI is its ability to produce pure hot spot images an absence of false positive signals robust quantification and tracer safety For molecular cellular applications fluorine MRI does not require a pre scan prior to tracer administration thus

offering several advantages over metal ion based proton 1H contrast agent approaches Key applications of 19F MRI include cell tracking inflammation detection and biosensing Fluorinated imaging tracers can also serve as therapeutic agents or drug delivery vehicles Over the past decade the field of 19F MRI has seen remarkable innovation in tracer designs and detection methods as well as the realization of its clinical potential This book is an interdisciplinary compendium detailing cutting edge science and biomedical research in the emerging field of 19F MRI and includes technical issues such as pulse sequence considerations and limits of detection of the techniques synthesis of novel 19F MRI tracer agents inflammation cancer and stroke imaging regenerative brain repair theranostic nanomedicine and clinical perspectives The book will appeal to investigators involved in MRI physics biomedicine immunology pharmacology and probe chemistry as well as general readers
