Developments in the Theory of Shells Holm Altenbach, Jacek Chróścielewski, Victor A. Eremeyev, Krzysztof Wiśniewski, 2019-09-25 This book commemorates the 80th birthday of Prof W Pietraszkiewicz a prominent specialist in the field of general shell theory Reflecting Prof Pietraszkiewicz's focus the respective papers address a range of current problems in the theory of shells In addition they present other structural mechanics problems involving dimension reduced models Lastly several applications are discussed including material models for such dimension reduced structures *Effects of Magnetoelastic Interactions in Conductive Plates and Shells* Gevorg Baghdasaryan, Marine Mikilyan, 2015-08-26 This book investigates the stability and vibrations of conductive perfectly conductive and superconductive thin bodies in electromagnetic fields It introduces the main principles and derives basic equations and relations describing interconnected mechanical and electromagnetic processes in deformable electro conductive bodies placed in an external inhomogeneous magnetic field and under the influence of various types of force interactions Basic equations and relations are addressed in the nonlinear formulation and special emphasis is placed on the mechanical interactions of superconducting thin body plates with magnetic fields **Electrodynamics of Continua I** A. Cemal Eringen, Gerard A. Maugin, 2012-12-06 The electrodynamics of continua is a branch of the physical sciences concerned with the interaction of electromagnetic fields with deformable bodies Deformable bodies are considered to be continua endowed with continuous distributions of mass and charge The theory of electromagnetic continua is concerned with the determination of deformations motions stress and electromagnetic fields developed in bodies upon the applications of external loads External loads may be of mechanical origin e g forces couples constraints placed on the surface of the body and initial and boundary conditions arising from thermal and other changes and or electromagnetic origin e g electric magnetic and current fields Because bodies of different constitutions respond to external stimuli in a different way it is imperative to characterize properly the response functions relevant to a given class of continua This is done by means of the constitutive theory For example an elastic dielectric responds to electromagnetic fields in a totally different way than a magnetic fluid The present book is intended to present a unified approach to the subject matter based on the principles of contemporary continuum physics **Constitutive Models for Rubber IV** Per-Erik Austrell, 2017-12-04 The unique properties of elastomeric materials offer numerous advantages in many engineering applications Elastomeric units are used as couplings or mountings between rigid components for example in shock absorbers vibration insulators flexible joints seals and suspensions etc However the complicated nature of the behaviour of such material makes it difficult to accurately predict the performance of these units using finite element modelling for example It is imperative that constitutive models accurately capture relevant aspects of mechanical behaviour The latest developments concerning constitutive modelling of rubber is collected in these Proceedings Topics included in this volume are Hyperelastic models Strength fracture fatigue Dynamic properties the Fletcher Gent effect Micro mechanical statistical approaches Stress softening iscoelasticity Filler reinforcement and Tyres fibre cord reinforced rubber **Applied**

**Mechanics Reviews** ,1975      **Theory of Electroelasticity** Zhen-Bang Kuang,2013-08-04 Theory of Electroelasticity analyzes the stress strain electric field and electric displacement in electroelastic structures such as sensors actuators and other smart materials and structures This book also describes new theories such as the physical variational principle and the inertial entropy theory It differs from the traditional method by using the physical variational principle to derive the governing equations of the piezoelectric material whereas the Maxwell stress is obtained automatically By using the inertial entropy theory the temperature wave equation is obtained very easily The book is intended for scientists researchers and engineers in the areas of mechanics physics smart material and control engineering as well as mechanical aeronautical and civil engineering etc Zhen Bang Kuang is a professor at Shanghai Jiao Tong University      **Analysis and Thermomechanics**

Bernard D. Coleman,Martin Feinberg,James Serrin,2012-12-06 This book presents a collection of papers giving the flavor of current research activities in continuum mechanics fluid mechanics thermodynamics and the mathematical analysis related to these topics Written by leading experts in the field all the papers in this collection have been carefully refereed according to the standards of the Archive for Rational Mechanics and Analysis      **Magneto-Active Polymers** Jean-Paul Pelteret,Paul Steinmann,2019-12-16 From fabrication to testing and modeling this monograph covers all aspects on the materials class of magneto active polymers The focus is on computational modeling of manufacturing processes and material parameters As other smart materials these elastomers have the ability to change electrical and mechanical properties upon application of magnetic fields This allows for novel applications ranging from biomedical engineering to mechatronics      **Advances in Applied Mechanics** ,1966-01-01 **Advances in Applied Mechanics**      **New Achievements in Continuum Mechanics and Thermodynamics** Bilen Emek Abali,Holm Altenbach,Francesco dell'Isola,Victor A. Eremeyev,Andreas Öchsner,2019-03-13 This book presents a liber amicorum dedicated to Wolfgang H Müller and highlights recent advances in Prof Müller's major fields of research continuum mechanics generalized mechanics thermodynamics mechanochemistry and geomechanics Over 50 of Prof Müller's friends and colleagues contributed to this book which commemorates his 60th birthday and was published in recognition of his outstanding contributions
