Magnetic Methods for the Treatment of Minerals J. Svoboda,1987 This book treats magnetic separation from the point of view of both the engineer in the field who operates magnetic separators and the research scientist in the laboratory It emphasizes those aspects of magnetic separation where lack of support in fundamental research is most evident The

intention is to bring the engineer and the scientist closer together to promote the application of basic physical phenomena in engineering practice and to gain the acceptance of the industry The book presents a fairly broad survey of magnetic separation as applied to and practised primarily by the mineral processing industries although its use in other industries is reviewed briefly It includes information on the physical principles of magnetic separation magnetic properties of minerals and their measurement the generation of magnetic field theoretical and practical problems of magnetic separation and experience gained in the design and operation of magnetic separation systems In detail the book consists of six chapters dealing with the following topics The Physical Properties of Magnetic Separation Review of Magnetic Separation Techniques Theory of High gradient Magnetic Separation Practical Aspects of Magnetic Separation Industrial Applications of High gradient Magnetic Separation and The Economics of Magnetic Separation The six appendices deal with symbols abbreviations values of physical constants conversions from one unit to another definitions of derived units and a list of selected equipment manufacturers There is a comprehensive bibliography almost 600 items and a subject index The book should be of value to engineers and consulting metallurgists as well as to students who want to learn more about this branch of technology It attempts to meet the needs of the growing number of engineers technologists and applied physicists who are engaged in the practical exploitation of magnetic separation

Non-linear Electromagnetic Systems Paolo Di Barba,A. Savini,2000 This text is a collection of contributions covering a wide range of topics of interdisciplinary character from materials to systems from microdevices to large equipment with special emphasis on emerging subjects and particular attention to advanced computational methods in order to model both devices and systems The book provides the solution to challenging problems of research on non linear electromagnetic systems and is expected to help researchers working in this broad area

Report of Investigations ,1992 *Magnetic Levitation* Peng Zhao,2024-01-03 This book introduces the MagLev testing method for density measurement and density based applications of diamagnetic and low magnetic objects using permanent magnets The book surveys the most relevant papers on the theory and model of various MagLev methods that have become the foundation to elucidate the principles of MagLev and the conditions for stable levitation A thorough summary of the improvements demonstrates the applications and potential of the MagLev method in many fields This book is separated into 11 chapters to present MagLev testing method fully including a review of the background of MagLev theories and basic principles of the stable levitation of object different dimensions of applications of MagLev in the fields of mechanical engineering chemistry and bioengineering and sophisticated applications of manipulation and separation This book would benefit the audience in the field of mechanical engineering chemistry materials science and bioengineering since magnetic levitation method has proved itself suitable for the density based analysis and applications of materials of different scales The analysis in this book will help the audience deeply understand the mechanism of magnetic levitation and it can serve as an instruction for the magnetic levitation procedure or guidebook for the magnetic levitation setup With the

viewpoints and thoughts about MagLev running through this book this book may spark the audience's interest towards magnetic levitation method and enlighten them to further develop Maglev method
