

The scanning electron microscope (SEM) enables us to see the often invisible world in which we live. In this unique book, you will see dimensional images and hand-colored photographs of everyday items such as string and table salt, plants, insects and other animals, and various parts of the body—all magnified dozens to thousands of times.

You will be astounded by the beauty and beautiful details of these electron microscope photos, called micrographs. Lift the flaps and you will discover intriguing structures. At the end of the book, you will have a chance to guess what objects or animals the micrographs are the flaps show.

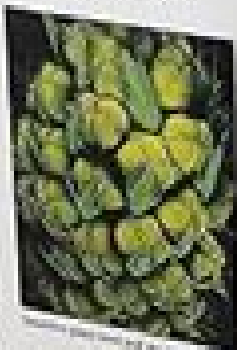

MAGNIFICATION reveals a surprising, hidden world for all ages to explore.

Micrograph of a complex, branching structure.

Micrograph of a textured, circular structure.

Micrograph of a green, segmented structure.

How to Use This Book
This book is designed to be used in two ways. You can use it as a reference book, looking up specific topics, or you can use it as a discovery book, exploring the world of the microscope. The book is divided into two main sections: the first section contains a list of topics, and the second section contains the micrographs and flaps. The topics are listed in alphabetical order, and the micrographs are arranged in a way that allows you to explore the world of the microscope in a systematic way.

How to Use the Flaps
The flaps are designed to be used in two ways. You can use them to reveal the hidden world of the microscope, or you can use them to explore the world of the microscope in a systematic way. The flaps are arranged in a way that allows you to explore the world of the microscope in a systematic way.
