A Guide to Detracking Math Courses Angela Torres,Ho Nguyen,Elizabeth Hull Barnes,Laura Wentworth,2023-05-03 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling curriculum professional development and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance equity in your school or district s mathematics education and also provides practical information to help students in a detracked system thrive **Mobile as Mainstream - Towards Future Challenges in Mobile**

The Making of Mathematics Carlo Cellucci,2022-03-07 This book offers an alternative to current philosophy of mathematics heuristic philosophy of mathematics In accordance with the heuristic approach the philosophy of mathematics must concern itself with the making of mathematics and in particular with mathematical discovery In the past century mainstream philosophy of mathematics has claimed that the philosophy of mathematics cannot concern itself with the making of mathematics but only with finished mathematics namely mathematics as presented in published works On this basis mainstream philosophy of mathematics has maintained that mathematics is theorem proving by the axiomatic method This view has turned out to be untenable because of G del s incompleteness theorems which have shown that the view that mathematics is theorem proving by the axiomatic method does not account for a large number of basic features of mathematics By using the heuristic approach this book argues that mathematics is not theorem proving by the axiomatic method but is rather problem solving by the analytic method The author argues that this view can account for the main items of the mathematical process those being mathematical objects demonstrations definitions diagrams notations explanations applicability beauty and the role of mathematical knowledge *Ethnomathematics* Arthur B. Powell,Marilyn

Frankenstein,1997-01-01 Presents the emerging field of ethnomathematics from a critical perspective challenging particular ways in which Eurocentrism permeates mathematics education and mathematics in general *Meeting SEN in the Curriculum: Maths* Brian Sharp,2012-12-06 Teachers are meeting more pupils with special needs in mainstream classrooms and although there are general issues to be aware of subject specialists will always want specific guidance and examples This series combines SEN expertise with subject knowledge to produce practical and immediate support including Policy writing and how to do it Simple explanations of SEN labels Creating an inclusive classroom environment Monitoring and assessment Working with TAs Includes CD Rom

More Trouble with Maths Steve Chinn,2016-07-21 More Trouble with Maths acknowledges that there are many reasons why children and adults are unable to function mathematically Difficulties include problems with rote learning basic facts and procedures debilitating anxiety poor working and short term memories and mathematics vocabulary Central to this new edition is a range of standardised tests and diagnostic activities including a 15 minute test of basic mathematics a thinking style test tests of basic fact retrieval and maths anxiety Guiding the reader in the interpretation of tests this new edition shows how identifying the barriers to learning is the first step in a programme of intervention Written in an engaging and user friendly style Steve Chinn draws on his extensive experience and expertise to

show how to consider and appraise the many factors relating to mathematical learning difficulties explain how these factors can be investigated explore their impact on learning mathematics Emphasising the need for a clinical approach when assessing individuals this book shows how diagnosis and assessment can become integrated into everyday teaching This highly practical and relevant resource is a crucial resource for anyone who wants to accurately and effectively identify the depth and nature of mathematical learning difficulties and dyscalculia **Sign Language in Mainstream Education for the Deaf and Hard-of-hearing Students in Asia** Gladys Tang, 2025-05-23 This book focuses on two means of recruiting sign language to support DHH students in mainstream education in Asia The first approach is educational sign interpreting which has been adopted to support signing DHH students in mainstream classrooms in Taiwan Contributions report on a questionnaire survey with post hoc interviews examining the reactions of students parents a resource teacher and an interpreter towards providing this service in the education system The second approach is co enrolment which involves bringing a critical mass of DHH students into the mainstream classroom for them to study with hearing children supported by either a deaf teacher or a teacher highly proficient in signing who co teaches with a regular teacher and co shares responsibilities in taking care of the whole class of students The chapters exemplifying this approach report on the effects of co enrolment on DHH students language development and academic attainment This book was originally published as a special issue of Deafness Education International **English as a Second Language in the Mainstream** Constant Leung, Christine Davison, Bernard Mohan, 2014-07-15 Since it was first established in the 1970 s the Applied Linguistics and Language Study series has become a major force in the study of practical problems in human communication and language education Drawing extensively on empirical research and theoretical work in linguistics sociology psychology and education the series explores key issues in language acquisition and language use English as a Second Language learners are now a considerable and increasing part of the mainstream of urban schools in English speaking countries Beyond the learning of English this development raises broader questions of language as a medium of education in a multilingual multicultural environment Drawing on their experience as researchers and educators in Australia Canada and England the authors of English as a Second Language in the Mainstream present an up to date account of advances in theory and practice Their analysis of system wide provision however suggests that a truly responsive educational vision is lacking government policy is inadequate educational practices for ESL students are either underdeveloped or poorly coordinated with practices for other students and the rhetoric of reform fails to engage significantly with issues of teaching and resources The authors argue towards a more comprehensive vision which can acknowledge the relation between issues concerning ESL students and issues concerning the educational system as a whole which can coordinate reforms in ESL education with general reforms which can explicitly and systematically integrate language learning and content learning and which can build more positively on the multilingual and multicultural nature of modern education for all students **International Journal of Mainstream**

Mathematics and War Bernhelm Booss,Jens Høyrup,2003-09-25

Mathematics has for centuries been stimulated financed and credited by military purposes Some mathematical thoughts and mathematical technology have also been vital in war During World War II mathematical work by the Anti Hitler coalition was part of an aspiration to serve humanity and not help destroy it At present it is not an easy task to view the bellicose potentials of mathematics in a proper perspective The book presents historical evidence and recent changes in the interaction between mathematics and the military It discusses the new mathematically enhanced development of military technology which seems to have changed the very character of modern warfare
