easily breached or vast new markets are conjured from nothing Trend lines resemble saw tooth mountain ridges The world not only feels different The data tell us it is different Based on years of research by the directors of the McKinsey Global Institute No Ordinary Disruption The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy the rise of emerging markets the accelerating impact of technology on the natural forces of market competition an aging world population and accelerating flows of trade capital and people Our intuitions formed during a uniquely benign period for the world economy often termed the Great Moderation Asset prices were rising cost of capital was falling labour and resources were abundant and generation after generation was growing up more prosperous than their parents But the Great Moderation has gone The cost of capital may rise The price of everything from grain to steel may become more volatile The world's labor force could shrink Individuals particularly those with low job skills are at risk of growing up poorer than their parents What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising memorable insights that enable us to quickly grasp the disruptive forces at work For evidence of the shift to emerging markets consider the startling fact that by 2025 a single regional city in China Tianjin will have a GDP equal to that of the Sweden of that in the decades ahead half of the world's economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard pressed to locate on a map What we are now seeing is no ordinary disruption but the new facts of business life facts that require executives and leaders at all levels to reset their operating assumptions and management intuition

Fashion in Altermodern China Feng Jie,2022-03-24 Fashion in Altermodern China examines key features of women s fashion within the cultural and political context of contemporary China While global brands and styles heavily influence Chinese consumer trends the Chinese fashion system is formed of its own internal logics and emergent trends too Adopting the theoretical term altermodern Feng Jie encourages us to view China in terms of its rapid modernization which presents its own rhythms and meanings and argues persuasively that Chinese fashion can t be wholly understood in terms of a Western discourse of modernity postmodernity and the global Expanding our understanding of the fashion system Fashion in Altermodern China takes on board new trends in global trade new technologies and the hybridity of designs and consumption of fashion Through critical readings of Barthes on the neutral and Jullien on blandness both directly influenced by Asian philosophies the author offers a new perspective on Chinese fashion arguing that while global local contexts lead to identifiably postmodern and hybrid aesthetics for women in contemporary China the flux and mix of available fashions is experienced in a more open neutral manner than scholars have previously described Crucially then rather than position trends in China only in terms of hybridity which betrays a Western bias and a binary logic of host recipient there are more fluid ways in which we need to understand how women engage in fashion in China today **Inventing the Cloud Century**
