and theorize the realities in postcolonial African states and the ramifications on the continent's future. Situating the study within the context of the prevailing cultural and geo-political realities in the postcolonial African states, the chapters illustrate the complex ways in which events and processes are experienced at the local level and how these local realities in turn impact and shape the patterns of political and military engagement in Africa and beyond. Organized along three major themes: Insurgency, governance and peacebuilding, expert researchers from around the world contribute chapters on Rebel and insurgent formations such as the RUF, the LRA and Boko Haram; state governance and corruption; terrorism and counter-terrorism; security and peacebuilding focussing on the tensions and challenges facing post-conflict societies such as Sierra Leone, Rwanda and the newest nation state on the continent, South Sudan. This highly significant and topical study problematizes the impact of wars on African nations as well as the epistemological framing of the local realities and fallouts of armed conflict on post-colonial states.

Cyclopædia of Political Science, Political Economy, and of the Political History of the United States: East India Company-Nullification John Joseph Lalor, 1883

Ecological Security Dennis Clark Pirages, Theresa Manley DeGeest, 2003-07-28

Global environmental politics has emerged from its initial incarnation in the arena of low politics and is rapidly becoming a high politics concern. Concern over water pollution, air pollution, deforestation and related basic environmental issues is giving way to a broader ecological security agenda. In this pathbreaking book, Dennis Clark Pirages and Theresa Manley DeGeest argue for dramatically broadening the context in which security priorities are established in an age of increasing globalization. Addressing the very fundamental question of the sources of premature human deaths and associated insecurity both historically and in the contemporary world, the authors observe that in the twentieth century starvation killed nearly as many people as did military conflict. But disease was responsible for killing nearly fourteen times as many people as was warfare. And in the contemporary world of the twenty-first century, environmental terrorism and biological warfare are blurring the traditional distinctions between natural disasters, accidental deaths and military casualties. Ecological Security moves the analysis of global environmental and resource issues to the next level by developing an eco-evolutionary perspective for analyzing emerging problems associated with rapid globalization. Preserving future ecological security will depend upon maintaining dynamic equilibriums among human populations and between them and pathogenic microorganisms, other species and the sustaining capabilities of nature. This eco-evolutionary framework is used to anticipate and analyze emerging demographic, ecological and technological discontinuities and dilemmas associated with rapid globalization. The authors conclude by stressing the need for new kinds of global public goods to mitigate the harshest impacts of these rapid and interrelated changes.

Reconstruction in North Carolina Joseph Grégoire de Roulhac Hamilton, 1914

Begins by looking at secession and war in North Carolina, then moves to the convention of 1865 and the political and social conditions under the restored government and then the final years of reconstruction during the 1870s.
