is becoming destabilized in the face of extraordinarily rapid change. The composition of the academy's most valuable asset, the faculty, and the essential nature of faculty work are being transformed. Jack H. Schuster and Martin J. Finkelstein describe the transformation of the American faculty in the most extensive and ambitious analysis of the American academic profession undertaken in a generation. A century ago the American research university emerged as a new organizational form animated by the professionalized discipline-based scholar. The research university model persisted through two world wars and greatly varying economic conditions. In recent years, however, a new order has surfaced, organized around a globalized knowledge-based economy, powerful privatization and market forces, and stunning new information technologies. These developments have transformed the higher education enterprise in ways barely imaginable in generations past. At the heart of that transformation but largely invisible has been a restructuring of academic appointments, academic work, and academic careers, a reconfiguring widely decried but heretofore inadequately described. This volume depicts the scope and depth of the transformation, combining empirical data drawn from three decades of national higher education surveys. The authors' portrait, at once startling and disturbing, provides the context for interpreting these developments as part of a larger structural evolution of the national higher education system. They outline the stakes for the nation and the challenging work to be done.

Psychology and Sociology Applied to Medicine E-Book Beth Alder, Edwin van Teijlingen, Michael Porter, 2011-11-29 This textbook in the Illustrated Colour Text series offers an integrated treatment of sociology and psychology for medical students. It is presented in a much more colourful and graphic format than is usual for books on these two subjects. This integration reflects the tendency to teach these two subjects together as behavioural science, with an increased stress on the place of medicine in society and on illness as a product of psychological and social circumstances rather than merely a biological phenomenon. The book reflects these trends and has been successful and popular with students. An integrated treatment of psychology and sociology for medical students in line with the trend towards teaching these subjects as behavioural sciences.

Use of case studies and Stop Think boxes encourages critical thinking and discussion Graphic Illustrated Colour Text presentation style enlivens a subject which most medical students are not keen on This third edition contains a new introduction on the importance and key features of the biopsychosocial model and additional double page spreads on International Health and Rural Health The Law School Buzz Book Vault Editors,2006-02-07 In this new edition Vault publishes the entire surveys of current students and alumni at more than 100 top law schools Each 4 to 5 page entry is composed of insider comments from students and alumni as well as the school s responses to the comments The Business School Buzz Book Vault Editors,2006-02-07 In this new edition Vault publishes the entire surveys of current students and alumni at more than 100 top business schools Each 4 to 5 page entry is composed of insider comments from students and alumni as well as the school s responses to the comments **Complete Book of Colleges, 2005 Edition** Princeton Review (Firm),2004-07-20 Up to date information on 1 780 colleges and universities **Career Choice in Management and Entrepreneurship** Mustafa F.
