Nature And The City:

Nature and the City Gene Desfor, Roger Keil, 2022-09-20 Pollution of air soil and waterways has become a primary concern of urban environmental policy making and over the past two decades there has emerged a new era of urban policy that links development with ecological issues based on the notion that both nature and the economy can be enhanced through technological changes to production and consumption systems This book takes a new look at this application of ecological modernization to contemporary urban political ecological struggles Considering policy processes around land use in urban watersheds and pollution of air and soil in two disparate North American global cities it criticizes the dominant belief in the power of markets and experts to regulate environments to everyone's benefit arguing instead that civil political action by local constituencies can influence the establishment of beneficial policies The book emphasizes subaltern environmental justice concerns as instrumental in shaping the policy process Looking back to the 1990s when ecological modernization began to emerge as a dominant approach to environmental policy and theory Desfor and Keil examine four case studies restoration of the Don River in Toronto cleanup of contaminated soil in Toronto regeneration of the Los Angeles River and air pollution reduction in Los Angeles In each case they show that local constituencies can develop political strategies that create alternatives to ecological modernization When environmental policies appear to have been produced through solely technical exercises they warn one must be suspicious about the removal of contention from the process In the face of economic and environmental processes that have been increasingly influenced by neo liberalism and globalization Desfor and Keil's analysis posits that continuing modernization of industrial capitalist societies entails a measure of deliberate change to societal relationships with nature in cities Their book shows that environmental policies are about much more than green capitalism or the technical mastery of problems they are about how future urban generations live their lives with sustainability and justice *Changing Representations of Nature and the City* Gabriel N. Gee, Alison

Vogelaar, 2018-07-04 The turn of the 1960s 70s characterized by the rapid acceleration of globalization prompted a radical transformation in the perception of urban and natural environments The urban revolution and related prospect of the total urbanisation of the planet in concert with rapid population growth and resource exploitation instigated a surge in environmental awareness and activism One implication of this moment is a growing recognition of the integration and interconnection of natural and urban entities The present collection is an interdisciplinary inquiry into the changing modes of representation of nature in the city beginning from the turn of the 1960s 70s Bringing together a number of different disciplinary approaches including architectural studies and aesthetics heritage studies and economics environmental science and communication the collection reflects upon the changing perception of socio natures in the context of increasing urban expansion and global interconnectedness as they were manifest in specific representations Using cases studies from around the globe the collection offers a historical and theoretical understanding of a paradigmatic shift whose material and

symbolic legacies are still accompanying us in the early 21st century *Urban Jungle* Ben Wilson, 2023-12-12 In this exhilarating look at cities past and future Ben Wilson proposes that in our world of rising seas and threatening weather the natural world may prove the city's savior Illuminating Wilson leaves readers with hope about the future of efforts to preserve the ecosystems that surround us as well as a new perspective that looks beyond the concrete and asphalt when walking along a city's streets Associated Press Since the beginning of civilization humans have built cities to wall nature out then glorified it in beloved but quite artificial parks In *Urban Jungle* Ben Wilson the author of *Metropolis* a seven thousand year history of cities that the Wall Street Journal called a towering achievement looks to the fraught relationship between nature and the city for clues to how the planet can survive in an age of climate crisis Whether it was the market farmers of Paris Germans in medieval forest cities or the Aztecs in the floating city of Tenochtitlan pre modern humans had an essential bond with nature But when the day came that water was piped in and food flown from distant fields that relationship was lost Today urban areas are the fastest growing habitat on Earth and in *Urban Jungle* Ben Wilson finds that we are at last acknowledging that human engineering is not enough to protect us from extremes of weather He takes us to places where efforts to rewild the city are under way to Los Angeles where the city's concrete river will run blue again to New York City where a bleak landfill will be a vast grassland preserve The pinnacle of this strategy will be Amsterdam a city that is its own ecosystem that makes no waste and produces its own energy In many cities Wilson finds nature is already thriving Koalas are settling in Brisbane wild boar may raid your picnic in Berlin Green canopies wildflowers wildlife the things that will help cities survive he notes also make people happy *Urban Jungle* offers the pleasures of history how backyard gardens spread exotic species all over the world how war produces biodiversity alongside a fantastic vision of the lush green cities of our future Climate change Ben Wilson believes is only the latest chapter in the dramatic human story of nature and the city *Nature in the City* Harini Nagendra, 2016-07-07 In a rapidly urbanizing India what is the future of nature conservation How does the march of development impact the conflict between nature and people in India's cities Exploring these questions *Nature in the City* examines the past present and future of nature in Bengaluru one of India's largest and fastest growing cities Once known as the Garden City of India Bengaluru's tree lined avenues historic parks and expansive water bodies have witnessed immense degradation and destruction in recent years but have also shown remarkable tenacity for survival This book charts Bengaluru's journey from the early settlements in the 6th century CE to the 21st century city and demonstrates how nature has looked and behaved and has been perceived in Bengaluru's home gardens slums streets parks sacred spaces and lakes A fascinating narrative of the changing role and state of nature in the midst of urban sprawl and integrating research with stories of people and places this book presents an accessible and informative story of a city where nature thrives and strives *Man and Nature in the City*, 1969 **Ecological Urbanism: The Nature of the City** Susannah Hagan, 2014-09-15 Ecological Urbanism *The Nature of the City* asks the questions that are important inside and outside the built environment professions

what are climate change urbanisation and ecology doing to the theory and practice of urban design How does Ecological Urbanism figure in this change What is Ecological Urbanism In answer this book is neither definitive impossible when a subject is still in motion nor encyclopaedic equally impossible when so much has been written on almost every aspect of these essays Instead it seeks to rebalance the ecological narrative and its embryonic modes of practice with the narratives of urbanism and its older deeply embedded modes of practice It examines the implications for cities and the designers of cities now we are required to again address their metabolic as well as social and formal dimensions and it explores the extent to which environmental engineering and natural systems design can and should become drivers for the remaking of cities in the 21st century Above all it argues that sooner rather than later urbanism needs to become environmentally literate and environmental design needs to become culturally literate Nature in a City Yard Charles Montgomery Skinner, 1897

Nature City Babalis, Dimitra, 2022-12-30 This volume is the expression of seven year scientific findings built within the INTEGRO UAD International Meetings convened at the University of Florence while the development of the collection of chapters reflects interpretations of the most pressing issues and necessary perspectives required to frame changes in planning and design In putting together this collection it is aimed to better understand questions prospects reflections and rules on improving urban strategies and tactics in balancing the needs of nature and the built form to deliver a place Discussions debates and stated considerations can now inspire to give a formal and comprehensive international attention to the transformation of urban heritage including ecological and sustainable design knowledge City of Nature Bernard Rosenthal, 1980 This book reexamines traditional assumptions about early American attitudes toward nature It also reopens and redefines the relationships of nature and civilization in the previous century and in so doing offers today's reader an insight into the basis for some contemporary attitudes toward the environment The works of major and minor American writers are considered **Nature and the City** Gene Desfor, Roger Keil, 2004-09 Pollution of air soil and waterways has become a primary concern of urban environmental policy making and over the past two decades there has emerged a new era of urban policy that links development with ecological issues based on the notion that both nature and the economy can be enhanced through technological changes to production and consumption systems This book takes a new look at this application of ecological modernization to contemporary urban political ecological struggles Considering policy processes around land use in urban watersheds and pollution of air and soil in two disparate North American global cities it criticizes the dominant belief in the power of markets and experts to regulate environments to everyone's benefit arguing instead that civil political action by local constituencies can influence the establishment of beneficial policies The book emphasizes subaltern environmental justice concerns as instrumental in shaping the policy process Looking back to the 1990s when ecological modernization began to emerge as a dominant approach to environmental policy and theory Desfor and Keil examine four case studies restoration of the Don River in Toronto cleanup of contaminated soil in Toronto regeneration of the

Los Angeles River and air pollution reduction in Los Angeles In each case they show that local constituencies can develop political strategies that create alternatives to ecological modernization When environmental policies appear to have been produced through solely technical exercises they warn one must be suspicious about the removal of contention from the process In the face of economic and environmental processes that have been increasingly influenced by neo liberalism and globalization Desfor and Keil s analysis posits that continuing modernization of industrial capitalist societies entails a measure of deliberate change to societal relationships with nature in cities Their book shows that environmental policies are about much more than green capitalism or the technical mastery of problems they are about how future urban generations live their lives with sustainability and justice

The Nature of Cities Michael Bennett, David W. Teague, 2021-10-12 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement

Merging City & Nature Batlleiroig, 2024-03-08 After 40 years of professional experience developed in three areas of work City Territory Landscape Public Space and Building Batlle i Roig acquires a new commitment and positions itself in the face of the climate emergency generating a sustainability matrix through which to contextualize your urban projects and urban strategies At Batlleiroig we have been talking about Landscape and Nature since our foundation in 1981 We are committed to the environment and involved in finding solutions to solve the climate emergency The motto Merging City and Nature serves to bring together our improvement commitments in each of the actions we carry out We work in three different

disciplines Urbanism Landscaping and Architecture trying to be very specialists in each of them but from the essential transversality that is required to develop any intervention The climate emergency becomes today our main transversality the one that should guide our actions

Philosophy of City and Nature İsa Eren AKBIYIK,2016-01-15 This book focuses on the unity of urbanization and natural environment Humans must live in harmony with nature because nature provides the basic resources necessary for human survival However the increase in human population and the acceleration of urban development have had a negative impact on the natural environment The effect of urbanization on the natural environment has been the subject of many studies that emphasize the importance of using natural elements in the design of artificial spaces and preserving green areas in cities *Man, Nature, City* Theodore W. The Forest and the City Cecil C. Konijnendijk,2018-03-12 Amsterdamse Bos Bois de Boulognes Epping Forest Hong Kong s country parks Stanley Park throughout history cities across the world have developed close relationships with nearby woodland areas In some cases cities have even developed and in some cases are promoting a distinct forest identity This book introduces the rich heritage of these city forests as cultural landscapes and shows that cities and forests can be mutually beneficial Essential reading for students and researchers interested in urban sustainability and urban forestry this book also has much wider appeal For with city forests playing an increasingly important role in local government sustainability programs it provides an important reference for those involved in urban planning and decision making public affairs and administration and even public health From providers of livelihoods to healthy recreational environments and from places of inspiration and learning to a source of conflict the book presents examples of city forests from around the world These cases clearly illustrate how the social and cultural development of towns and forests has often gone hand in hand They also reveal how better understanding of city forests as distinct cultural and social phenomena can help to strengthen synergies both between cities and forests and between urban society and nature
