mathematical community This volume is dedicated to the life and memory of Ron Graham and includes 20 articles by leading scientists across a broad range of subjects that reflect some of the many areas in which Ron worked **The Mathematics Teacher**, 1925 The Man Who Loved Only Numbers Paul Hoffman, 2024-05-07 A funny marvelously readable portrait of one of the most brilliant and eccentric men in history The Seattle Times Paul Erdos was an amazing and prolific mathematician whose life as a world wandering numerical nomad was legendary He published almost 1500 scholarly papers before his death in 1996 and he probably thought more about math problems than anyone in history Like a traveling salesman offering his thoughts as wares Erdos would show up on the doorstep of one mathematician or another and announce My brain is open After working through a problem he'd move on to the next place the next solution Hoffman's book like Sylvia Nasar's biography of John Nash A Beautiful Mind reveals a genius's life that transcended the merely quirky But Erdos's brand of madness was joyful unlike Nash's despairing schizophrenia Erdos never tried to dilute his obsessive passion for numbers with ordinary emotional interactions thus avoiding hurting the people around him as Nash did Oliver Sacks writes of Erdos A mathematical genius of the first order Paul Erdos was totally obsessed with his subject he thought and wrote mathematics for nineteen hours a day until the day he died He traveled constantly living out of a plastic bag and had no interest in food sex companionship art all that is usually indispensable to a human life The Man Who Loved Only Numbers is easy to love despite his strangeness It's hard not to have affection for someone who referred to children as epsilons from the Greek letter used to represent small quantities in mathematics a man whose epitaph for himself read Finally I am becoming stupider no more and whose only really necessary tool to do his work was a quiet and open mind Hoffman who followed and spoke with Erdos over the last 10 years of his life introduces us to an undeniably odd yet pure and joyful man who loved numbers more than he loved God whom he referred to as SF for Supreme Fascist He was often misunderstood and he certainly annoyed people sometimes but Paul Erdos is no doubt missed Therese Littleton **In Their Own Way** Thomas Armstrong, 2000-08-07 Does your child have a favorite subject activity or hobby Children learn in multiple ways and educator Thomas Armstrong has shown hundreds of thousands of parents and teachers how to locate those unique areas in each of our children where learning and creativity seem to flow with special vigor In this fully updated classic on multiple intelligences Armstrong sheds new light on the eight ways to bloom or the eight kinds of multiple intelligences While everyone possesses all eight intelligences Armstrong delineates how to discover your child's particular areas of strength among them The book shatters the conventional wisdom that brands our students as underachievers unmotivated or as suffering from learning disabilities attention deficit hyperactivity disorder or other learning diseases Armstrong explains how these flawed labels often overlook students who are in possession of a distinctive combination of multiple intelligences and demonstrates how to help them acquire knowledge and skills according to their sometimes extraordinary aptitudes Filled with resources for the home and classroom this new edition of In Their Own Way offers inspiration for every learning situation Math Out Loud:
