Place For Us How To Make Society Civil:

A Place for Us Benjamin R. Barber, 2004-02 In our crowded noisy world too many people too much crime too many wars not enough time it seems almost impossible to locate and preserve the common ground where a civil society might flourish Whatever happened to the civic virtue and community life that nourished true democracy In this provocative hard hitting book political scientist Benjamin Barber tackles these questions head on and in answering them retrieves the ideals of civil society from the nostalgists who want to re create old fashioned and discriminatory small communities and from the free marketeers who associate it with unfettered commercial activity Commentators have been making a fashion of civil society but they tend to mean many different things by the phrase this bracingly clear book shows how diverse the various notions are and how best to think about them Barber proposes practical strategies for making civil society real for civilizing public discourse and promoting civic debate and for affirming values beyond those of work and leisure commerce and bureaucracy

Community, Democracy, and the Environment Jane A. Grant, 2003 Insuring the continued integrity of the global environment may now be linked to the ability of humans to strengthen existing and develop new opportunities and institutions in which to democratically explore shared ethics about the future The nature of the ties we have to one another in our communities the quality of the attachments we have to our political institutions and the presence or absence of public spaces within which to deliberate about our deepest concerns may have profound implications for the biosphere Community Democracy and the Environment looks the changing character of community and polity in the United States The book proposes the development of a realm of civil ethics where citizens democratically deliberate about values reviews the changing orientations of Americans to the environment and environmental policy and examines why a new direction in energy policy is critical to our environmental future The book concludes with some directions for how humans may better learn to share the future with each other and the other species with whom we share the planet

The Politics of Moralizing Jane Bennett, Michael J. Shapiro, 2013-09-13 The Politics of Moralizing issues a stern warning about the risks of speaking writing and thinking in a manner too confident about one's own judgments and asks Can a clear line be drawn between dogmatism and simple certainty and indignation Bennett and Shapiro enter the debate by questioning what has become a popular even pervasive cultural narrative told by both the left and the right the story of the West's moral decline degeneration or confusion Contributors explore the dynamics and dilemmas of moralizing by advocates of patriotism environmental protection and women's rights while arguing that the current discourse gives free license to self aggrandizement cruelty vengeance and punitiveness and a generalized resistance to or abjection of diversity

Alexis de Tocqueville and the Art of Democratic Statesmanship Brian Danoff, L. Joseph Hebert Jr., 2010-12-13 In 1835 Alexis de Tocqueville famously called for a new political science that could address the problems and possibilities of a world itself quite new For Tocqueville the democratic world needed not just a new political science but also new arts of statesmanship and leadership In this volume Brian Danoff and L. Joseph Hebert Jr. have brought together a diverse set of essays revealing that Tocqueville's understanding of democratic statesmanship remains highly relevant today The first chapter of the book is a new translation of Tocqueville's 1852 address to the Academy of Moral and Political Sciences in which Tocqueville offers a

profound exploration of the relationship between theory and practice and between statesmanship and political philosophy. Subsequent chapters explore the relationship between Tocqueville's ideas on statesmanship on the one hand and the ideas of Plato, Aristotle, Machiavelli, Montesquieu, the Puritans, the Framers of the U.S. Constitution, Oakeshott, Willa Cather, and the Second Vatican Council on the other. Timely and provocative, these essays show the relevance of Tocqueville's theory of statesmanship for thinking about such contemporary issues as the effects of NGOs on civic life, the powers of the American presidency, the place of the jury in a democratic polity, the role of religion in public life, the future of democracy in Europe, and the proper balance between liberalism and realism in foreign policy.

The Politics and Civics of National Service Melissa Bass, 2013-01-03. In 1933 President Franklin D. Roosevelt created America's first domestic national service program, the Civilian Conservation Corps (CCC). As part of this program, the largest and most highly esteemed of its kind, nearly three million unemployed men worked to rehabilitate, protect, and build the nation's natural resources. It demonstrated what citizens and government could accomplish together. Yet despite its success, the CCC was short-lived. While more controversial programs such as President Johnson's Volunteers in Service to America (VISTA) and President Clinton's AmeriCorps survived, why did CCC die? And why, given the hard-won continuation and expansion of AmeriCorps, is national service an option for fewer Americans today than at its start nearly eighty years ago? In *The Politics and Civics of National Service*, Melissa Bass focuses on the history, current relevance, and impact of domestic civilian national service. She explains why such service has yet to be deeply institutionalized in the United States while military and higher education have solidified their roles as American institutions. Civilian national service is still not recognized as a long-term policy option. Bass argues that only by examining these programs over time can we understand national service's successes and limitations, both in terms of its political support and its civic lessons. *The Politics and Civics of National Service* furthers our understanding of American political development by comparing programs founded during three distinct political eras: the New Deal, the Great Society, and the early Clinton years, and tracing them over time. To a remarkable extent, the CCC, VISTA, and AmeriCorps reflect the policymaking ethos and political controversies of their times, illuminating principles that hold well beyond the field of national service. By emphasizing these programs' effects on citizenship and civic engagement, *The Politics and Civics of National Service*

Law in a New Key Amitai Etzioni, 2010-12-01. A book for thoughtful readers and not particularly lawyers or scholars of law and society who are engaged in the issues of the day and want something other than easy answers from the right and left. Most issues of law and social policy can be understood better through a lens that balances rights and interests and protects

all of us while protecting each of us says renowned communitarian sociologist Amitai Etzioni in his latest of 30 books *In Law in a New Key* Etzioni addresses hot bed issues of terrorism drone warfare airport security and scanners government surveillance norms of social disapproval and forgiveness human rights and respect for ethnic cultural differences He shares his perspective as one who has fought in a resistance and then later became a professor at Columbia University and The George Washington University The perspective and his decades of academic research persuaded him that the answer to thorny legal and policy issues is found neither in unyielding devotion to individual rights at all costs nor in reflexive empowerment of the state in times of crisis and pain The answer is in moral dialogs respect for the basic right to life and security responsible checks on power and a balancing of interests that all must be seen as legitimate in a world of pundits and partisans who favor one right What good is the right to privacy if the basic right to live is sacrificed as the right holder is blown out of the sky If new technologies make it possible to conduct terrorism and crime without the law catching up to them What happens when respect for one religious position means choosing among religious positions A collection of 15 trenchant essays drawn from the popular press and academic journals yet accessible to a spectrum of readers who care about the key issues of the day and see the complexity in them *Law in a New Key* takes a fresh look at so many important topics that need examination through a community concerned lens The frame gives contours and substance to today's debates without offering the usual entrenched policy solutions of kneejerk partisans Etzioni asks such questions frankly and on a variety of topics that matter Rights carry responsibilities and freedom and human rights must put living first in a world that does not always concede that self evident proposition It is book about law and society whose time has come For many readers the social and legal notes he plays will finally sound in their register

Portrays the progressive school reform work of the Harmony Education Center over a 12 year period Management Education and Humanities Barbara Czarniawska-Joerges, 2006 Academics and managers who strive for a humanistic management education usually care for people but they are challenged by sophisticated intellectual subjects and practical problems The authors experience competence and commitment enables them to present an extensive coverage of important views and an in depth study of these issues Eduard Bonet ESADE Spain This volume is a timely initiative It resonates with important questions on globalization and its consequences on the unrelenting quest for efficiency and productivity on recent corporate scandals and on the responsibilities of managers and management education This book is a manifesto for an intellectual revolution In a complex and open world managers often bump into the limits of the decontextualized tools associated with mainstream management knowledge and practice Managers have to navigate in a world that is not only economic but also political cultural shaped by history and ethical traditions and preoccupations not only as a mark of social capital but really as a way to enhance their managerial skills and efficiency The role of management education should be to prepare them for that odyssey and this volume tells us that humanities could be a powerful tool in that sense This project is

served by a highly legitimate international panel of contributors who collectively point towards an alternative for management thinking and management education Marie Laure Djelic ESSEC Business School France Management Education and Humanities argues that management teachers and researchers seem to be increasingly dissatisfied with the way managers are usually educated in western countries It claims that educational practices and methods would greatly benefit from reflection on the implicit assumptions and paradigms behind those practices and debates the role that humanism and humanities might play in the formation of new managerial elites The book examines three themes that have emerged as central to the contemporary debate on management education the profession of management humanism as a philosophy and worldview and the humanities as an academic field where management schools could find new inspirations for curricula All three themes are scrutinized in a frame of reference extended between two different points of view the traditional view with its tendency to idealize and even sometimes romanticize humanism the humanities and management as a social function and the past modern view which is inclined to skepticism and to the deconstruction of social and cultural phenomena Providing a lively account of this ongoing debate and exploring new trends and experiences in management education this book will be invaluable reading for teachers students and researchers of management management strategy and organizational behaviour
