Being in Time to the Music David Ross, 2008-12-18 Being in time to the music from the ground up is a work in phenomenology where this term is broadly defined comprehending Plato Heidegger Hegel and Marx The most direct referent is Hegel together with the theoretical revolution that he initiated with Phenomenology of Mind This text's more general purpose is to set the tone for a 21st communism based upon the idea of dancing with death assuming full responsibility for one's mortality and abandoning the self to love as the meaning of existence This dance is choreographed through my conversations with the above mentioned writers In conversing with them I aim to displace if not usurp them from the throne of honour which is nothing more than the authority borrowed from me By this I do not intend to deny completely their other to me character However they exist or even figure for me both in the sense of of count having importance as those that I read and by which I read myself They have borrowed my authority namely my own potential to be an author So reading them is to re assume that borrowed authority The life of the reader to paraphrase Barthes begins with the death of the author
