and intensification along lines which are purely commercial On a comparatively small area thousands of ducklings can be reared and marketed yearly The call for information concerning the methods used by these commercial duck raisers has been considerable and since such information is not available in complete concise form the present book has been prepared partly to furnish just this information The methods used by successful Long Island duck raisers differ widely in some particulars and since in the space at command it has been impossible to describe all the methods used the plan has been adopted of detailing in the main the methods of one successful grower This it is believed will prove to be more helpful and less confusing than to attempt to give the method of several different men Much space has been given to the operations of the commercial duck raisers but the fact is recognized that the great bulk of the ducks entering into the trade of the country is the product of small flocks kept on general farms For this reason a chapter has been added dealing with duck raising on the farm and attention is here called to the fact that most of the information given under commercial duck raising can be readily adapted to use in connection with the farm flock
