one note of agreement the nation's school system has not delivered universal quality education Accordingly debate has raged over how to rectify this situation Should the government increase funding encourage privatisation some of both Another option though has emerged and is seemingly gaining popularity home schooling Citing both substandard education and displeasure with school environments and curricula many parents have decided to teach their own children Supporters say it is well within their rights to raise their children as they see fit and that at home learning is superior to the public system Detractors claim that home schooled children are deprived of social interaction and the broad based education provided by the system Neither side wants to cede ground making the issue of home schooling an integral part of a wider national debate on education In this book the specific topic of home schooling is presented from all relevant sides to give a complete picture of the present status of the issue and its potential for future resolution Following this overview is a thorough and carefully selected bibliography of literature about home schooling from all viewpoints Easy access to this important resource is then provided via author title and subject indexes

*Speech and Language Challenges* Marlene Targ Brill, 2014-09-11 More than three million people in the United States stutter In excess of

a million students from ages 3 to 21 receive school services for speech and language problems. Another five million Americans live with a disability from brain injury which usually includes communication difficulties. Half a million teens in the U.S. between 14 and 17 speak a language other than English at home and have difficulty communicating in English at school. These numbers continue to grow and more students are accessing speech and language assistance every year.

**Speech and Language Challenges: The Ultimate Teen Guide** by Marlene Targ Brill addresses the various speech issues that affect all people but specifically focuses on the concerns of young adults. Brill looks at not just the how and whys of each issue but how to cope with them. The author first explains how normal speech and language develops then discusses issues that occur as a result of physical limitations, brain processing impairment, or language barriers. The chapters in this book offer insights into Stuttering and Other Fluency Challenges, Speech Sound Disorders, Voice Disorders, Language Disorders, Brain Injury and Communication, English as a New or Different Language. Additional chapters explore technological advances that help young adults communicate better, public speaking tips and suggestions for handling everyday social and family situations. Drawing on interviews with teens, first-hand accounts and quotes from experts, **Speech and Language Challenges: The Ultimate Teen Guide** also includes a list of resources making it a valuable tool for young adults and their families.

**The Tyranny of the Meritocracy** by Lani Guinier, 2016-01-12. A fresh and bold argument for revamping our standards of merit and a clear blueprint for creating collaborative education models that strengthen our democracy rather than privileging individual elites. Standing on the foundations of America's promise of equal opportunity, our universities purport to serve as engines of social mobility and practitioners of democracy. But as acclaimed scholar and pioneering civil rights advocate Lani Guinier argues, the merit systems that dictate the admissions practices of these institutions are functioning to select and privilege elite individuals rather than create learning communities geared to advance democratic societies. Having studied and taught at schools such as Harvard University, Yale Law School, and the University of Pennsylvania Law School, Guinier has spent years examining the experiences of ethnic minorities and of women at the nation's top institutions of higher education and here she lays bare the practices that impede the stated missions of these schools. Goaded on by a contemporary culture that establishes value through ranking and sorting, universities assess applicants using the vocabulary of private, highly individualized merit. As a result of private merit standards and ever-increasing tuitions, our colleges and universities increasingly are failing in their mission to provide educational opportunity and to prepare students for productive and engaged citizenship. To reclaim higher education as a cornerstone of democracy, Guinier argues that institutions of higher learning must focus on admitting and educating a class of students who will be critical thinkers, active citizens, and publicly spirited leaders. Guinier presents a plan for considering democratic merit a system that measures the success of higher education not by the personal qualities of the students who enter but by the work and service performed by the graduates who leave. Guinier goes on to offer vivid examples of communities that have developed effective learning strategies based not on an individual's merit but on the

collaborative strength of a group learning and working together supporting members and evolving into powerful collectives Examples are taken from across the country and include a wide range of approaches each innovative and effective Guinier argues for reformation not only of the very premises of admissions practices but of the shape of higher education itself
