 sighthounds have seen a huge rise in popularity over the past 40 years and where once the lurcher was the shadowy unseen

 companion and family pet The pure sighthound breeds have always had their aficionados whether as workers pets or show
 and racing dogs this book is written with all running dogs in mind the term by which the author refers to lurchers and

 sound and healthy in their work and the author has drawn upon her many years experience with working lurchers in order to

Culture of the British Columbia Plateau Brian Hayden, 2011-11-01 Early hunter gatherer societies have traditionally been
 considered basically egalitarian in nature This assumption however has been challenged by contemporary archaeological and
 anthropological research which has demonstrated that many of these societies had complex social economic and political
 structures This volume considers two British Columbia Native communities the Lillooet and Shuswap communities of
 Fountain and Pavilion and traces their development into complex societies The authors explore the relation between resource
 characteristics and hunter gatherer adaptations and examine the use of fish animal and plant species documenting their
 availability and the techniques used in their gathering processing and storing The book also shows how cultural practices
 such as raiding potlatching and stewardship of resources can be explained from a cultural ecological point of view An
 important contribution to the study of hunting and gathering cultures in the Northwest this book is the most detailed
 examination of the subsistence base of a particular hunting and gathering group to date Its exploration of the reasons why

complex hunting and gathering societies emerge as well as the ecological relationships between cultures and resources will make an important contribution to the study of cultural ecology and contemporary archaeology **Sunsweet Standard**
