Legal Geography Matteo Nicolini, 2022-12-05 This book invites readers to critically rethink the interrelations between geography and the law. Traditionally legal geographical interrelations have been dominated by scholars with backgrounds in geopolitics, economics or geography. More recently, a new interdisciplinary approach has been developed with the aim of offering a fresh perspective on how law and geography intersect. There has been a steady growth in cross-disciplinary research in this field. How legal geographical taxonomies interrelate has attracted attention from scholars and academics with a diverse range of backgrounds, namely law, anthropology and human physical geography, thus giving rise to several publications. Against this backdrop, the book adopts a legal comparative perspective and assesses normative spatialities which are the outcomes of processes of legal spatial production. In addition, the comparative analysis offers readers new insights on some traditional geographic features which are essential to legal studies: territorial identity, regional demarcation, territorial alternation and place name policy. Examples are drawn from several jurisdictions, both from the Global North and the Global South, and partly employ a diachronic perspective. As its subversive character is ideally suited to revealing policies and agendas, comparative law is used to identify the ethnocentric and colonial biases underpinning the use and misuse of legal geographic devices by policymakers and academics. In sum, the book presents legal geography as an interdisciplinary undertaking in which geographers and legal scholars can jointly examine common concepts in the historical, cultural, political and social contexts in which law is practised. The book transcends the boundaries between disciplines to engage in a fruitful dialogue on how the law can help to address the current socio-geographic and ecological crises.

Geographers T. W. Freeman, 2016-01-28 An annual collection of studies of individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world and include famous names as well as those less well known: explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work, and discusses their influence and spread of academic ideas. Each study includes a select bibliography and brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date.

The Human Mosaic Terry G. Jordan-Bychkov, 2005-08-19 Carrying forward the legacy of original author Terry Jordan-Bychkov, Mona Domosh and new coauthors Roderick Neumann and Patricia Price offer this thoroughly updated new edition of the acclaimed introduction to the cultural geography of the world today. The result is a text that maintains its original distinctive style while addressing

contemporary issues and situations that students care about most importantly the continuing phenomenon of globalization

The Thematic Approach of The Human Mosaic The Human Mosaic introduces five themes in the opening chapter culture region cultural diffusion cultural ecology cultural interaction and cultural landscape then uses those themes as a framework for the topical chapters that follow Each theme is applied to a variety of geographical topics demography agriculture the city religion language ethnicity politics industry folk and popular culture Through this organization students are able to relate to the most important aspects of cultural geography at every point in the text
