Rand McNally Zip Code Finder Rand McNally, 1991-10 *Organizations and Strategies in Astronomy* Andre

Heck, 2012-12-06 Research and publications in the field of Astronomy have undergone dramatic changes in the last half century. While activities just slowed down during World War II in the US and in Latin America they were very strongly affected by the difficult conditions prevailing among the European belligerent nations. Half a century ago research activities were mostly confined to observatories linked or not to universities and usually separated from the teaching of physical sciences. Hence directors of observatories played an important role in the choice of the research fields and schools of research appeared at various places developing specific instrumentation, reduction techniques and mathematical methods to achieve their scientific goals. Reorganising the research activities after the war was no minor undertaking specially because communications were interrupted for over five years and isolated continental Europe from overseas activities. Scarcity of observing instruments, some of them being requisitioned by occupying armies, enormous gaps in the available literature led to local research activities conducted independently of similar efforts undertaken elsewhere.

Geographic Profiling D. Kim Rossmo, 1999-12-28 As any police officer who has ever walked a beat or worked a crime scene knows, the street has its hot spots, patterns and rhythms. Drug dealers work their markets, prostitutes stroll their favorite corners and burglars hit their favorite neighborhoods. But putting all the geographic information together in cases of serial violent crime, murder, rape, arson, bombing and robbery is highly challenging. Just ask the homicide detectives of the Los Angeles Police Department who hunted the Hillside Stranglers or law enforcement officers in Louisiana who tracked the brutal South Side rapist. Geographic Profiling introduces and explains this cutting edge investigative methodology in depth. Used to analyze the locations of a connected series of crimes to determine the most likely area of offender residence, geographic profiling allows investigators and law enforcement officers to more effectively manage information and focus their investigations. This extensive and exhaustive work explains geographic profiling theories and principles and includes an extensive review of the literature and research in the areas of criminal profiling, forensic behavioral science, serial violent crime, environmental criminology and the geography of crime. For investigators and police officers deployed in the field as well as criminal analysts. Geographic
