Suspense Peter Vorderer,Hans Jurgen Wulff,Mike Friedrichsen,2013-12-16 This volume begins with the general assumption that suspense is a major criterion for both an audience s selection and evaluation of entertaining media offerings This assumption is supported not only by the popularity of suspenseful narratives but also by the reasons users give for their actual choice of media contents Despite this there is no satisfying theory to describe and explain what suspense actually is how exactly it is caused by films or books and what kind of effect it has on audiences This book s main objective is to provide that theory by bringing together scholars from different disciplines who are working on the issue The editors goal is to reflect the state of the art as much as it is to highlight and encourage further developments in this area There are two ways of approaching the problem of describing and explaining suspense an analysis of suspenseful texts or the reception process Researchers who follow the more text oriented approach identify the uncertainty of the narrative outcome the threat or danger for the protagonist the play with time delay or other factors as important and necessary for the production of suspense The more reception oriented scholar focuses on the cognitive activities of audiences readers expectations the curiosity of onlookers their emotions and their relationships with the protagonists A correspondence between the two seems to be quite difficult though necessary to determine Both perspectives are important in order to describe and explain suspense Thus the editors utilize the thesis that suspense is an activity of the audience reader onlooker etc that is related to specific features and characteristics of the text books films etc Their question is What kind of relation The answer comes from finding out how why and which elements of the text cause effects that are experienced as suspense Scholars from semiotics literary criticism cultural studies and film theory assess the problem from a text oriented point of

view dealing primarily with the how and which Other scholars present the psychological perspective by focusing on the cognitive and emotional processes that underlie viewers experience of suspense that is the reception theory tries to answer the question of why suspenseful texts may be experienced as they are **Tortured Logic** Joseph K. Young, Erin M. Kearns, 2020-07-28 Experts in the intelligence community say that torture is ineffective Yet much of the public appears unconvinced surveys show that nearly half of Americans think that torture can be acceptable for counterterrorism purposes Why do people persist in supporting torture and can they be persuaded to change their minds In Tortured Logic Erin M Kearns and Joseph K Young draw upon a novel series of group experiments to understand how and why the average citizen might come to support the use of torture techniques They find evidence that when torture is depicted as effective in the media people are more likely to approve of it Their analysis weighs variables such as the ethnicity of the interrogator and the suspect the salience of one's own mortality and framing by experts Kearns and Young also examine who changes their opinions about torture and how demonstrating that only some individuals have fixed views while others have more malleable beliefs They argue that efforts to reduce support for torture should focus on convincing those with fluid views that torture is ineffective The book features interviews with experienced interrogators and professionals working in the field to contextualize its findings Bringing empirical rigor to a fraught topic Tortured Logic has important implications for understanding public perceptions of counterterrorism strategy **Forthcoming Books** Rose Arny, 2000
