Rank And Religion In Tikopia A Study In Polynesian Paganism And Conversion To Christianity:

Rank and Religion in Tikopia Raymond Firth, 2011 Originally published in 1970 this book represents a unique study of beliefs and ritual practices in a pagan religion and of the processes by which a transformation to Christianity took place Christianity came to the major islands of Polynesia nearly two centuries ago and within a couple of generations the traditional pagan religion had disappeared Only a few remote islands such as Tikopia preserved their ancient cults Over eighty years ago the author first observed and took part in these pagan rites and on later visits he studied the change from paganism to Christian faith Unique in its rich documentation this book presents a systematic account of the traditional beliefs in gods and spirits and of the way in which these were fused with the social and political structure The causes and dramatic results of the conversion to Christianity are then described ending with an examination of the religious situation at the time of the book's original publication The book is both a contribution to anthropology and a case study in religious history It completes the major series of studies of Tikopia society for which the author is famous It gives the first full account of a Polynesian religious system in a state of change Rank and Religion in Tikopia (Routledge Revivals) Raymond

The New Science of the Enchanted Universe Marshall Sahlins, 2023-12-05 The vast majority of human societies known to us have been organized along immanentist lines In such societies as Marshall Sahlins argues everything we associate with religion gods and spirits of every sort is part of the daily embodied immanent lives of people Plants and animals have souls and the same essential attributes as other persons and supposedly long dead ancestors continue to live among people communicate with them and have sway over the course of events In this enchanted type of society there is no strict separation between economics politics religion philosophy and culture Some 2 500 years ago at the dawn of the so called Axial Age a radical transformation in human societies began when civilizations spread around the globe from their origins in Greece the Near East northern India and China These civilizations effected a cultural revolution creating a new type of society in which the things we typically associate with religion move from immanent infrastructure to transcendent superstructure Only in a transcendentalist society does it make sense to speak of a god or God and of a heaven out there above us or in a separate realm entirely And only in such a society do we have a division of labour separating out an economic sphere from a political sphere and a sphere of culture Transcendentalist worldviews and modes of life are of course pervasive today They are so much a part of who we are that when we attempt to understand the nature and workings of immanentist societies we often misdescribe them in transcendentalist terms This confusion observes Sahlins has long bedeviled the social sciences and consequently has impeded our understanding of many Indigenous religions and worldviews past and present Sahlins drawing on a vast array of recent and older ethnographic and historical research offers this book as both diagnosis of these ills and a call to correction to develop a new science that would be better positioned to grasp the realities of immanentist societies and to take seriously the cultures of others
