Rapid Population Change In China 1952-1982 Report Committee On Population And Demography:

Rapid Population Change in China, 1952-1982 National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population and Demography, 1984-01-01 The remarkable changes in fertility nuptiality and mortality that have occurred in the People's Republic of China from the early 1950s to 1982 are summarized in this report Data are based largely on the single year age distributions tabulated in the 1953 1964 and 1982 censuses of China and a major 1982 fertility survey **Rapid Population Change in China, 1952-1982** Ansley J. Coale, 1980 **Security and development assistance** United States. Congress. Senate. Committee on Foreign Relations, 1988 *World Development Report 2012* World Bank, 2011-09-01 This year's World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process **World Development Report 2012** The International Bank for Reconstruction and Development / The World Bank The International Bank for Reconstruction and Development / The World Bank, 2011-09-28 The lives of women around the world have improved dramatically at a pace and scope difficult to imagine even 25 years ago Women have made unprecedented gains in rights education health and access to jobs and livelihoods More countries than ever guarantee equal rights in property marriage and other domains Gender gaps in primary schooling have closed in many countries while in a third of all countries girls now outnumber boys in secondary school And more young women than men attend universities in 60 countries Women are using their education to participate more in the labor force they now make up for 40 percent of the global labor force and 43 percent of its farmers Moreover women now live longer than men in every region of the world Despite the progress gaps remain in many areas Women are more likely to die relative to males in many low and middle income countries than their counterparts in rich countries especially in childhood and during their reproductive years Primary and secondary school enrollments for girls remain much lower than for boys in many Sub Saharan African countries and some parts of South Asia as well as among disadvantaged populations Women are more likely than men to work as unpaid family laborers or in the informal sector to farm smaller plots and grow less profitable crops operate in smaller firms and less profitable sectors and generally earn less Women especially poor women have less say over decisions and less control over household resources And in most countries fewer women participate in formal politics than men and are underrepresented in the upper echelons The World Development Report 2012 Gender Equality and Development argues that closing these persistent gender gaps matters It matters because gender equality is a core development objective in its own right But it is also smart economics Greater gender equality can enhance productivity improve development outcomes for the next generation and make institutions more representative Building on a growing body of knowledge on the economics of gender equality and development the Report identifies the areas where gender gaps are most significant both intrinsically and in terms of their potential development payoff and where growth alone cannot solve the issues It then sets forth four

priorities for public action Reducing excess female mortality and closing education gaps where they remain Improving access to economic opportunities for women Increasing women s voice and agency in the household and in society Limiting the reproduction of gender inequality across generations

The Population of Modern China Dudley L. Poston Jr.,David Yaukey,2013-11-11 Student interested in world populations and demography inevitably need to know China As the most populous country of the world China occupies a unique position in the world population system How its population is shaped by the intricate interplays among factors such as its political ideology and institutions economic reality government policies sociocultural traditions and ethnic divergence represents at once a fascinating and challenging arena for investigation and analysis Yet for much of the 20th century while population studies have developed into a mature science precise information and sophisticated analysis about the Chinese population had largely remained either lacking or inaccessible first because of the absence of systematic databases due to almost uninterrupted strife and wars and later because the society was closed to the outside observers for about three decades since 1949 Since the end of the Cultural Revolution things have dramatically changed China has embarked on an ambitious reform program where modernization became the utmost goal of societal mobilization China could no longer afford to rely on imprecise census or survey information for population related studies and policy planning nor to remaining closed to the outside world Both the gathering of more precise information and access to such information have dramatically increased in the 1980s Systematic observations analyses and reporting about the Chinese population have surfaced in the population literature around the globe

China's Economy Looks Toward the Year 2000 ,1986

Farewell to the God of Plague Miriam Gross,2016-01-19 Farewell to the God of Plague reassesses the celebrated Maoist health care model through the lens of Mao s famous campaign against snail fever Using newly available archives Miriam Gross documents how economic political and cultural realities led to grassroots resistance Nonetheless the campaign triumphed but not because of its touted mass prevention campaign Instead success came from its unacknowledged treatment arm carried out jointly by banished urban doctors and rural educated youth More broadly the author reconsiders the relationship between science and political control during the ostensibly antiscientific Maoist era discovering the important role of grassroots science in regime legitimation and Party control in rural areas

J. Mayone Stycos, This volume draws together some of the pioneer figures in the social science arena who have been working at the margins of demography and other social sciences These articles show the willingness of the new demography to venture into a variety of other disciplines to better appreciate its own special contributions to the world of interdisciplinary research **China's Bloody Century** R. J. Rummel,2017-07-12 Except for Soviet citizens no people in this century have endured so much mass killing as have the Chinese They have been murdered by rebels conniving with their own rulers and then after the defeat in war of the imperial dynasty by soldiers of other lands They have been killed by warlords who ruled one part of China or another They have been executed by Nationalists or Communists because they had the wrong beliefs or attitudes or were simply in the wrong place at the wrong time In China s Bloody Century R J Rummel s careful estimate of the total number of killings exceeds 5 million How do we explain such killings crossing ideological bounds and political conditions According to Rummel the one constant factor in all the Chinese mass murder as it was in the Soviet Union and Nazi Germany is arbitrary power It was the factor that united warlords Nationalists Communists and foreign armies The author argues that whenever such undisciplined power is centralized and unchecked the possibility exists that it will be used at the whim of dictators to kill for their own ends whether the aim is ethnic racial purity national unity development or utopia The book presents successive periods in modern Chinese history with each chapter divided into three parts Rummel first relates the history of the period within which the nature and the amount of killings are presented He then provides a detailed statistical table giving the basic estimates with their sources and qualifications The final part offers an appendix that explains and elaborates the statistical computations and estimates While estimates are available in the literature on the number of

Death by Government R. J. Rummel, 1997-01-01 This is R J Rummel's fourth book in a series devoted to genocide and government mass murder or what he calls democide He presents the primary results in tables and figures as well as a historical sketch of the major cases of democide those in which one million or more people were killed by a regime In Death by Government Rummel does not aim to describe democide itself but to determine its nature and scope in order to test the theory that democracies are inherently nonviolent Rummel discusses genocide in China Nazi Germany Japan Cambodia Turkey Yugoslavia Poland the Soviet Union and Pakistan He also writes about areas of suspected genocide North Korea Mexico and feudal Russia His results clearly and decisively show that democracies commit less democide than other regimes The underlying principle is that the less freedom people have the greater the violence the more freedom the less the violence Thus as Rummel says The problem is power The solution is democracy The course of action is to foster freedom Death by Government is a compelling look at the horrors that occur in modern societies It depicts how democide has been very much a part of human history Among other examples the book includes the massacre of Europeans during the Thirty Years War the
