Rational Commitment And Social Justice Essays For Gregory Kavka:

Rational Commitment and Social Justice Jules L. Coleman, Christopher W. Morris, Gregory S. Kavka, 1998-11-13 Gregory S. Kavka 1947-94 was a prominent and influential figure in contemporary moral and political philosophy. The essays in this volume are concerned with fundamental issues of rational commitment and social justice to which Kavka devoted his work as a philosopher. The essays take Kavka's work as a point of departure and seek to advance the respective debates. The topics include the relationship between intention and moral action as part of which Kavka's famous toxin puzzle is a focus of discussion; the nature of deterrence; the rationality of morals; contractarian ethics; and the contemporary relevance of Hobbes' political thought. Incorporating important philosophical statements of problems and fresh contributions to the ongoing debate about rational intention, this volume will interest not just philosophers but also political scientists and economists.

Libertarian Accounts of Free Will Randolph Clarke, Randolph K. Clarke, 2005-12-08 This comprehensive study offers a balanced assessment of libertarian accounts of free will. Bringing to bear recent work on action causation and causal explanation, Clarke defends a type of event causal view from popular objections concerning rationality and diminished control. He subtly explores the extent to which event causal accounts can secure the things for the sake of which we value free will, judging their success here to be limited. Clarke then sets out a highly original agent causal account, one that integrates agent causation and nondeterministic event causation. He defends this view from a number of objections but argues that we should find the substance causation required by any agent causal account to be impossible. Clarke concludes that if a broad thesis of incompatibilism is correct, one on which both free will and moral responsibility are incompatible with determinism, then no libertarian account is entirely adequate. **Contractualism and the Foundations of Morality** Nicholas

Southwood, 2013-11-07 Contractualism has a venerable history and considerable appeal. Yet as an account of the foundations or ultimate grounds of morality, it has been thought by many philosophers to be subject to fatal objections. In this book, Nicholas Southwood argues otherwise. Beginning by detailing and diagnosing the shortcomings of the existing Hobbesian and Kantian models of contractualism, he then proposes a novel deliberative model based on an interpersonal deliberative conception of practical reason. He argues that the deliberative model of contractualism represents an attractive alternative to its more familiar rivals and that it has the resources to offer a more compelling account of morality's foundations, one that does justice to the twin demands of moral accuracy and explanatory adequacy. The Cambridge History of Moral

Intergenerational Justice Lukas H. Meyer, 2017-05-15 The essays selected for this volume show how relations between past current and future generations have become a major subject of philosophical research since the 1970s The relations between people alive today with people who may exist in the future and people now deceased differ from relations between contemporaries and in ways that raise new conceptual logical and substantive questions Among the questions addressed in this volume are what is the status of people now deceased and people who may exist in the future Can the latter be harmed by the actions of people alive today What duties of justice do we have towards people with whom we can neither interact nor co operate and can people who are indirect victims of past injustices legitimately claim compensation Answers to these questions are relevant in a number of policy areas most notably in issues regarding reparations for historical injustice and responding to climate change and its consequences The Oxford Handbook of Animal Ethics Tom L. High and Low Corruption Harry Adams, 2023-12-19 High and Low Corruption Children Capabilities and Crime provides a systematic theory of corruption and analyzes high corruption in terms of political corruption and high end white collar crime and low corruption in terms of juvenile delinquency and street crime It shows how delinquents and street criminals often suffer from arrested development of their basic human capabilities In turn

Harry Adams argues that their maldevelopment often emerges neither merely through their own fault when they were children nor through the fault of biological caregivers who were guilty of parental child neglect. Beyond this, Adams argues that the maldevelopment of at-risk youth commonly emerges through a kind of political child neglect when corrupt public officials fail to provide adequate protection or back-up support for their development. In these ways, the author shows how the former type of high corruption or suite crime can significantly contribute to the latter type of corruption and street crime. By applying a set of moral constitutional and criminological principles from Derek Parfit, Ronald Dworkin, and Jeffrey Reiman respectively, Adams also provides a systematic account of why and how both these types of corruption should be curbed.

The Stag Hunt and the Evolution of Social Structure Brian Skyrms, 2004. Brian Skyrms, author of the successful *Evolution of the Social Contract* which won the prestigious Lakatos Award, has written a sequel. The book is a study of ideas of cooperation and collective action. The point of departure is a prototypical story found in Rousseau's *A Discourse on Inequality*. Rousseau contrasts the pay-off of hunting hare where the risk of non-cooperation is small but the reward is equally small against the pay-off of hunting the stag where maximum cooperation is required but where the reward is so much greater. Thus rational agents are pulled in one direction by considerations of risk and in another by considerations of mutual benefit. Written with Skyrms's characteristic clarity and verve, this intriguing book will be eagerly sought out by students and professionals in philosophy, political science, economics, sociology, and evolutionary biology.

Reasons for Action David Sobel, Steven Wall, 2009-04-27. What are our reasons for acting? Morality purports to give us these reasons, and so do norms of prudence and the laws of society. The theory of practical reason assesses the authority of these potentially competing claims, and for this reason, philosophers with a wide range of interests have converged on the topic of reasons for action. This volume contains eleven essays on practical reason by leading and emerging philosophers. Topics include the differences between practical and theoretical rationality, practical conditionals, and the wide scope ought, the explanation of action, the sources of reasons, and the relationship between morality and reasons for action. The volume will be essential reading for all philosophers interested in ethics and practical reason.

Intergenerational Justice Janna Thompson, 2009-05-01. In this timely study, Thompson presents a theory of intergenerational justice that gives citizens duties to past and future generations, showing why people can make legitimate demands of their successors and explaining what relationships between contemporary generations count as fair. What connects these various responsibilities and entitlements is a view about individual interests that both argues that individuals are motivated by intergenerational concerns and that a polity that appropriately recognizes these interests must support and accept intergenerational responsibilities. The book ranges over the philosophical, ethical, political, and

environmental questions raised by intergenerational issues how we can have duties to non-existent people whether we can wrong the dead or be held responsible for what they did what sacrifices we should make for our successors and whether we have duties to people of the remote future Encompassing the ethical problems created by demographic change the ethical issues of population control and intergenerational implications of new technologies for creating people this book will be of interest to those studying philosophy politics legal theory and environmental studies *Parental Obligations and Bioethics*
Bernard G. Prusak, 2013-10-15 This book examines the question of what parental obligations procreators incur by bringing children into being Prusak argues that parents as procreators have obligations regarding future children that constrain the liberty of would-be parents to do as they wish Moreover these obligations go beyond simply respecting a child's rights He addresses in turn the ethics of adoption child support gamete donation surrogacy prenatal genetic enhancement and public responsibility for children
