

Social Sources of the Spirit: Connecting Rational Choice and Interactive Ritual Theories in the Study of Religion*

Joseph O. Baker

East Tennessee State University

In recent years rational choice approaches have increasingly been employed in the sociological study of religion; however, theory and research from this perspective typically overlook the role of emotionally efficacious collective rituals. This study synthesizes interactive ritual theory with the rational choice concept of strictness, which highlights the level of behavioral prohibitions religious groups place on adherents. Analyses of data from the first wave of the National Congregations Study indicate a positive relationship between a group's level of behavioral strictness and the production of an enthusiastic, outwardly emotive worship style. In general, the effort is made to highlight the utility of combining a focus on the production of collective, social "goods" in religious groups with considerations of interactive rituals and emotion.

Key words: Pentecostalism; rational choice theory; ritual; theory; emotions.

A focus on ritual, collective effervescence, and membership in a particular community permeates *The Elementary Forms of Religious Life* ([1912] 1995). Considering Durkheim's auspicious place in the sociological cannon, it is surprising that these elements have been overlooked by some prominent theoretical approaches to religion. This neglect may stem from a desire to leave the trails pioneered by classical theorists (e.g., Stark 2004), or perhaps from the ever-increasing focus on quantitative analysis and the difficulty of measuring empirically amorphous concepts like collective effervescence. Nevertheless, there remains an important place for studying rituals, emotion, and attachment to a collectivity in the sociology of religion. The optimal course for integrating these elements remains debatable however, as recent

Rational Choice Theories Of Religion:

Choice and Religion Steve Bruce, 1999 The orthodox view is that the democracies of the western world have become increasingly secular over the twentieth century Fewer and fewer people have chosen to believe and the church has declined markedly as religion has changed from being part of an identity ascribed at birth to being a matter of personal choice Choice and Religion provides a detailed critique of the rational choice approach to religion to demonstrate that industrialisation has secularised the western world and that diversity far from making religion more popular by allowing individuals to maximize their returns undermines it The claim that diversity and competition promote religion is refuted with evidence from a wide variety of western societies Bruce examines the Nordic countries and the ex communist states of eastern Europe to explore the consequences of different sorts of state regulation and to show that ethnicity is a more powerful determinant of religious change than market structures Where religion matters it is not because individuals are maximising their returns it is because it defines group identity and is heavily implicated in social conflict

The Parting of the Ways Stephen Spence, 2004 This book seeks to inject into the general discussion of the Parting of the Ways of Judaism and Christianity the social realities of the separation of a particular Christian community and a particular Jewish community By drawing upon the literary and the historical data available concerning the church in Rome Spence seeks to discover when and how Christians came to see themselves as an identifiably distinct community His findings will surprise those who see the Parting of the Ways as a slow process He argues that although the parting was early it was not without its complications Drawing upon the work of Rodney Stark a sociologist of religion Spence suggests that within the church in Rome there was a struggle between those who saw the church as a Jewish sect and those who saw the church as a Roman cult a struggle already underway when the Apostle Paul wrote Romans This struggle however was not an even one because it was the cultists those for whom the church's primary social location was the pagans of Rome who held the positions of power over the numerically smaller sectarians who sought to maintain the church's primary identity as a Jewish sect acceptable within the synagogues of Rome
