Gendered Approaches to Spatial Development in Europe Barbara Zibell, Doris Damyanovic, Ulrike Sturm, 2019-03-27 This book explores the extent to which gendered approaches are evident and effective in spatial development in selected European countries Beginning with an introduction to theories and concepts of gender space and development the book includes a brief historical review of gender in spatial planning and development throughout Europe in general and an overview of different national frameworks in European countries comparing legal organisational and cultural similarities and differences This is followed by a critical reflection on how simplifications and stereotypes of gender concepts are used in the practice of spatial development The main part of the book offers a transnational discussion of planning practices on selected thematic topics It starts with gender sensitivity in urban master planning and at neighbourhood level referring to different types of planning manuals Furthermore the book focuses on gender sensitive evaluation in urban planning as well as international agendas for sustainable development as a framework for a new generation of gender equality policies The chapter authors assert that climate change migration and austerity have threatened gender equality and therefore spatial development needs to be especially alert to gender dimensions The editors end with an outlook and suggestions for further action and research on gender issues in spatial development With inputs from some of Europe's leading thinkers on gender space and development this volume is designed to inspire students scholars and practitioners to reflect upon the contribution that gendered

approaches can make in the various fields of spatial development and environmental planning *Africa's Development Dynamics 2018 Growth, Jobs and Inequalities* African Union Commission,OECD,2018-07-11 This first edition explores the dynamics of growth jobs and inequalities It proposes ten decisive actions to promote sustainable economic and social development and to strengthen institutions in Africa **State of the World's Cities 2008/9** Un-Habitat,2012-05-04 Cities are perhaps one of humanity s most complex creations never finished never definitive They are like a journey that never ends Their evolution is determined by their ascent into greatness or their descent into decline They are the past the present and the future Cities contain both order and chaos In them reside beauty and ugliness virtue and vice They can bring out the best or the worst in humankind They are the physical manifestation of history and culture and incubators of innovation industry technology entrepreneurship and creativity Cities are the materialization of humanity s noblest ideas ambitions and aspirations but when not planned or governed properly can be the repository of society s ills Cities drive national economies by creating wealth enhancing social development and providing employment but they can also be the breeding grounds for poverty exclusion and environmental degradation The 21st Century is the Century of the City Half of humanity now lives in cities and within the next two decades 60 per cent of the world s people will reside in urban areas How can city planners and policymakers harmonize the various interests diversity and inherent contradictions within cities What ingredients are needed to create harmony between the physical social environmental and cultural aspects of a city and the human beings that inhabit it This report adopts the concept of Harmonious Cities as a theoretical framework in order to understand today s urban world and also as an operational tool to confront the most important challenges facing urban areas and their development processes It recognizes that tolerance diversity social justice and good governance all of which are inter related are as important to sustainable urban development as physical planning It addresses national concerns by searching for solutions at the city level For that purpose it focuses on three key areas spatial or regional harmony which examines the main drivers of urban growth in the developing world and explores the spatial nuances of economic and social policies social harmony which presents and analyzes new data on urban inequalities worldwide and describes the types of shelter deprivations experienced by slum dwellers in developing world regions and environmental harmony which examines the role of cities in the climate change debate and the impact of global warming on the most vulnerable cities The report also assesses the various intangible assets within cities that contribute to harmony such as cultural heritage sense of place and memory and the complex set of social and symbolic relationships that give cities meaning It argues that these intangible assets represent the soul of the city and are as important for harmonious urban development as tangible assets Harmony within cities argues the report is both a journey and a destination Published with UN HABITAT *The Urban Ecologies of Divided Cities* Amira Osman,John Nagle,Sabyasachi Tripathi,2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities

represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers

The Making of Urban America Raymond A. Mohl, 1997-06 This second edition is designed to introduce students of urban history to recent interpretive literature in this field Its goal is to provide a coherent framework for understanding the pattern of American urbanization while at the same time offering specific examples of the work of historians in the field

Urban Geography Michael Pacione, 2009-03-16 Today for the first time in

the history of Humankind urban dwellers outnumber rural residents Urban places towns and cities are of fundamental importance for the distribution of population within countries in the organization of economic production distribution and exchange in the structuring of social reproduction and cultural life and in the allocation and exercise of power Furthermore in the course of the present century the number of urban dwellers and level of global urbanisation are destined to increase Even those living beyond the administrative or functional boundaries of a town or city will have their lifestyle influenced to some degree by a nearby or even distant city The analysis of towns and cities is a central element of all social sciences including geography which offers a particular perspective on and insight into the urban condition The principal goal of this third edition of the book remains that of providing instructors and students of the contemporary city with a comprehensive introduction to the expanding field of urban studies The structure of the first two editions is maintained with minor amendments Each of the thirty chapters has been revised to incorporate recent developments in the field All of the popular study aids are retained the glossary has been expanded and chapter references and notes updated to reflect the latest research This third edition also provides new and expanded discussions of key themes and debates including detailed consideration of metacities boomburbs public space urban sprawl balanced communities urban economic restructuring poverty and financial exclusion the right to the city urban policy reverse migration and traffic and transport problems The book is divided into six main parts Part one outlines the field of urban geography and explains the importance of a global perspective Part two explores the growth of cities from the earliest times to the present day and examines the urban geography of the major world regions Part three considers the dynamics of urban structure and land use change in Western cities Part four focuses on economy society and politics in the Western city In part five attention turns to the urban geography of the Third World where many of the countries experiencing highest rates of urban growth are least well equipped to respond to the economic social political and environmental challenge Finally part six affords a prospective on the future of cities and cities of the future New to this edition are further readings based on the latest research updated data and statistics an expanded glossary new key concepts additional study questions and a listing of useful websites The book provides a comprehensive interpretation of the urban geography of the contemporary world Written in a clear and readable style lavishly illustrated with more than eighty photographs 180 figures 100 tables and over 200 boxed studies and with a plethora of study aids Urban Geography A Global Perspective represents the ultimate resource for students of urban geography

American Monthly Review of Reviews Albert Shaw,1929 **The American Review of Reviews** Albert Shaw,1929 **Women, Modernity, and Landscape Architecture** Sonja DümpeImann,John Beardsley,2015-02-11

Modernity was critically important to the formation and evolution of landscape architecture yet its histories in the discipline are still being written This book looks closely at the work and influences of some of the least studied figures of the era established and less well known female landscape architects who pursued modernist ideals in their designs The women

discussed in this volume belong to the pioneering first two generations of professional landscape architects and were outstanding in the field. They not only developed notable practices but some also became leaders in landscape architectural education as the first professors in the discipline or prolific lecturers and authors. As early professionals who navigated the world of a male dominated intellectual and menial work force they were exponents of modernity. In addition many personalities discussed in this volume were either figures of transition between tradition and modernism like Silvia Crowe, Maria Teresa Parpagliolo or they fully embraced and furthered the modernist agenda like Rosa Kliass, Cornelia Oberlander. The chapters offer new perspectives and contribute to the development of a more balanced and integrated landscape architectural historiography of the twentieth century. Contributions come from practitioners and academics who discuss women based in USA, Canada, Brazil, New Zealand, South Africa, the former USSR, Sweden, Britain, Germany, Austria, France and Italy. Ideal reading for those studying landscape history, women's studies and cultural geography.
