debates surrounding policy reform of the social protection system of dependent older persons      **Dilemmas of the Welfare**

**Mix** Ugo Ascoli, Costanzo Ranci, 2013-04-17 The 1990 s will be remembered in Europe as the period in which privatization assumed significant proportions in the field of welfare policies In an age of crisis for the welfare state and increased demand of care services there is now a widespread opinion that future welfare systems will see more and more space occupied by private and nonprofit organizations taking the direct responsibility of providing services and meeting the needs of the clients A welfare mix is emerging as a system in which government private and nonprofit organizations operate in place of the state monopoly nonprofit organizations in particular have obtained formal recognition as partners of public authorities and professional groups in policy making An increasing interdependence between state private and third sector organizations will characterize next years all post industrial societies Through research in the field of social care in six European Countries France Germany Italy Norway Spain and the U K the authors highlight the role of nonprofit and commercial organizations in the new welfare mix systems and main social and institutional effects of such new order This volume in the Nonprofit and Civil Society Studies series is the first attempt to bridge the relevant gap existing between the literature on the welfare state and studies on the nonprofit sector      **Negotiating Change** Carol Diane St Louis, 2011 Throughout the last decades advanced industrial democracies have been confronted by the long term pressures of globalisation rising and persistent unemployment ageing populations rising health care costs and the severe but shorter term shocks of recession currency runs and other troubles The international political economy literature is rife with observations that states are under increasing pressure to reduce taxes and to trim their budgets and recent austerity efforts in Europe and the United States support the view that governments are responding to these intensifying economic and political incentives by constraining their spending Simultaneously governments encounter political pressures to maintain or expand their social welfare safety nets in order to meet the needs of their most vulnerable populations the unemployed and underemployed the sick and disabled pensioners and the poor Despite these common pressures there has been a great degree of divergence over the last decades Variation endures in terms of the aggregate levels of taxation and expenditures and the distribution of costs and benefits among the citizenry Reforms have differed in regard to whether they are approached in a confrontational manner by the government alone or in consensual negotiated process that includes the parliamentary opposition trade unions and employers associations Some painful reforms have been met with massive strikes and protests while other painful reforms have been accepted with relative equanimity Finally there has been a great deal of variance in the ability of various governments to adopt and implement their reform packages and to survive the potential backlash in response to these reforms Considering the cases of France Italy and Germany during the 1990s this dissertation sheds new light on the factors determining the approach to reform the distribution of costs and benefits and the likelihood that governments will succeed in their attempts to adopt and implement reforms Chapter 1 introduces the core questions presents a brief overview of the theory and explains

the methodology and case selection Chapter 2 develops a theoretical framework for understanding a the factors that lead governments to adopt a particular approach to a reform b the role that partisanship plays in determining the distributional implications of reform c the effect that the approach and the distributional implications of the reform have upon how the parliamentary opposition the social partners and the public respond to the reform and d the role that response plays in determining the ultimate fate of the reform and in some cases the fate of that government Chapter 3 considers the experiences of France exploring the theory s ability to explain a case of a typical state facing conflicting economic and political pressures to reform its economic fiscal and social welfare policies Chapter 4 tests the theory s applicability to Italy a country undergoing a particularly high level of economic and political stress Chapter 5 focuses upon the apparently deviant case of Germany where both the reform approach and the distributional implications of the reform seem to run counter to the theory s predictions Deep examination of the role of party factions and shifts in the balance of power within the governing coalition reveals the importance of considering the preferences of the reform leadership rather than the coalition as a whole in order to generate accurate predictions and interpretations Chapter 6 concludes with an overview of generalisable conclusions and future research directions

**Projecting the Impact of Demographic Change on the Demand for and Delivery of Healthcare in Ireland** , Journal of Economic Literature , 1997 *Community-Based Programs and Policies* Howard A. Palley, 2014-01-02 This collection is focused on the provision of community based programs and activities in health and related long term care services that have contributed or may in the future contribute to social policy development Several of the articles in this collection deal with community based health and long term care program and policy initiatives that have been facilitated through federal programs such as Medicare Medicaid and the Older Americans Act The implementation of some of these community based programs have significantly influenced social policy thinking regarding the beneficial effects of integrating medical and social aspects of health and long term care services as well as the health care team approach to the delivery of health and long term care services Another dimension addressed is the impact of interest groups such as family caregivers in advancing social policy that supports the efforts of community based family care givers in providing

services to patients in need The underlying theme is how such local community programs have contributed in a variety of ways to the development of social policies at the community level that in many ways focus on the integration of health and related long term care services and a health care team approach to the provision of such services The book will be of interest to community development courses in Schools of Social Work and other health professions such as Nursing and Public Health It will also be of interest to health policy programs in public administration and other social sciences This book was published as a special issue of Social Work in Public Health

### **Regulation of Health: Case Studies of Sweden and Switzerland**

Peter Zweifel, Carl Hampus Lyttkens, Lars Söderström, 2012-12-06 Health care arguably is the single most regulated industry in industrial countries and possibly in newly industrialized and developing countries as well But what exactly is being regulated what are the instruments used and what are the effects and side effects of such regulation Regulation of Health Case Studies of Sweden and Switzerland seeks to resolve problems in answering these key questions regarding the health care sector in two countries Sweden and Switzerland The volume contains a series of studies that compare the regulation of health and health care in these two apparently very similar countries in considerable detail The contributing teams acquired a great deal of knowledge about health regulation in both countries they also derived comparative predictions when regulation differs using actual observations to check whether these predictions are borne out These comparisons are based on the conditions prevailing in the mid nineties
