Longitudinal Research On Individual Development Present Status And Future Perspectives:

Longitudinal Research on Individual Development David Magnusson, Paul Casaer, 1993-11-18 This book examines the scope for longitudinal studies in a range of developmental fields *Studying individual Development in An interindividual Context* Lars R. Bergman, David Magnusson, Bassam M. El Khouri, 2003-01-30 During the last decade there has been increased awareness of the limitations of standard approaches to the study of development When the focus is on variables and relationships the individual is easily lost This book describes an alternative person oriented approach in which the focus is on the individual as a functioning whole The authors take as their theoretical starting points the holistic interactionistic research paradigm expounded by David Magnusson and others and the new developmental science in which connections and interactions between different systems biological psychological social etc are stressed They present a quantitative methodology for preserving to the maximum extent possible the individual as a functioning whole that is largely based on work carried out in the Stockholm Laboratory for Developmental Science over the past 20 years The book constitutes a complete introductory guide to the person oriented approach The authors lay out the underlying theory a number of basic methods the necessary computer programs and an extensive empirical example The computer programs have been collected into a statistical package SLEIPNER that is freely accessible on the Internet The empirical example deals with boys school adjustment from a pattern perspective and covers both positive and negative adaptation *Studying Individual Development in an Interindividual Context A Person Oriented Approach* will be crucial reading for all researchers who seek to understand the complexities of human development and for their advanced students **Advances in Psychological Science: Social, personal, and cultural aspects** John G. Adair, David Bélanger, Kenneth L. Dion, Michel Sabourin, 1998 The volumes *Advances in Psychological Science* are the most timely reviews for a person who wants an up to date state of the art description of selected topics in psychology These volumes will be useful for the graduate student to get a perspective on the latest developments in psychology today The chapters are written in a non technical manner i e not for the specialist but for the educated psychologist who wishes to see developments across the spectrum of psychology They may be used for teaching or by experts who wish an overview of recent advances in their science The chapters uniquely reflect the international or global character of psychology both in the authors selected to write them and in their coverage of research from around the world Volume 1 contains original contributions to the social personal and cultural aspects of the discipline **Advances in Psychological Science, Volume 2** Fergus Craik, Michele Robert, Michel Sabourin, 2014-01-21 The chapters in this volume are the edited versions of invited addresses to the XXVI International Congress of Psychology held in Montréal in August 1996 As one major goal of the Congress was to promote communication among specializations in scientific psychology the speakers were asked to survey their research area and present their own work in a way that would be accessible to their colleagues in other areas Another purpose of the meeting was to bring researchers together from different parts of the world

reflecting their different approaches to the scientific study of mind brain and behavior Consequently the eminent researchers who have written the twenty six chapters included in the present volume were drawn from universities and research institutes in North America Europe Japan Russia Israel and New Zealand The chapters cover a range of topics in human and animal experimental psychology The first section deals with psychobiological processes the interplay of body and mind in determining intelligence stress and pain The next five chapters address current issues in neuropsychology and neuroscience including the neural correlates of attention and vision A third section looks at learning processes in humans and animals and a fourth deals with a range of topics in perception and cognition The final five chapters take a developmental perspective presenting theoretical and empirical analyses of the acquisition of perceptual and cognitive abilities Overall the collection illustrates the growing trend to break down traditional barriers between areas of experimental psychology there are many instances of profitable interactions between researchers studying aspects of behavior and those studying the biological bases of these behaviors The twenty six chapters give an excellent overview of current research in scientific psychology

The Lifespan Development of Individuals David Magnusson,1997-10-28 A full understanding of the developmental process in individuals requires contributions from disciplines including developmental biology and psychology physiology neuropsychology social psychology sociology and anthropology This ambitious and wide ranging book integrates the findings from these and related areas to form a holistic view of human development from conception to death Distinguished scientists have combined their expertise in a synthesis of biological and social sciences that will demand the attention of all researchers and practitioners concerned with human development across the lifespan Based on a Nobel symposium the topics discussed range from the function and development of single cells to the whole organism interacting with its environment Drawing upon new theories and models including the study of nonlinear dynamic systems and chaos theory this book represents a major step in the move towards an integrated science of human development

Handbook of the Life Course Michael J. Shanahan, Jeylan T. Mortimer, Monica Kirkpatrick Johnson,2015-10-26 Building on the success of the 2003 Handbook of the Life Course this second volume identifies future directions for life course research and policy The introductory essay and the chapters that make up the five sections of this book show consensus on strategic next steps in life course studies These next steps are explored in detail in each section Section I on life course theory provides fresh perspectives on well established topics including cohorts life stages and legal and regulatory contexts It challenges life course scholars to move beyond common individualistic paradigms Section II highlights changes in major institutional and organizational contexts of the life course It draws on conceptual advances and recent empirical findings to identify promising avenues for research that illuminate the interplay between structure and agency It examines trends in family school and workplace as well as contexts that deserve heightened attention including the military the criminal justice system and natural and man made disaster The remaining three sections consider advances and suggest strategic opportunities in the study of health and development

throughout the life course They explore methodological innovations including qualitative and three generational longitudinal research designs causal analysis growth curves and the study of place Finally they show ways to build bridges between life course research and public policy

Developmental Science and the Holistic Approach Lars R. Bergman, Robert B. Cairns, Lars-Goran Nilsson, Lars Nystedt, 2000 This volume celebrates David Magnusson's career long contributions with a collection of chapters by internationally renowned colleagues on the holistic approach that is transforming developmental psychology For developmentalists and lifespan researchers

The Berlin Aging Study Paul B. Baltes, Karl Ulrich Mayer, 2001-03-19 The present and future of our society are shaped by an ever increasing proportion of old and very old people The Berlin Aging Study is one of the largest interdisciplinary efforts to explore old age and aging Unique aspects of the Berlin Aging Study are the spectrum of scientific disciplines involved the range of discipline specific and interdisciplinary research topics the focus on very old age 70 to over 100 years and the empirical reference to a representative heterogeneous urban population The study's first cross sectional findings on intellectual abilities self and personality social relationships physical health functional capacity medical treatment mental disorders such as depression and dementia socioeconomic conditions activities everyday competence subjective well being and gender differences are reported in depth in this book The study was carried out in the context of the Berlin Brandenburg Academy of Sciences study group on Aging and Social Development The authors primarily conduct their research at the Berlin Max Planck Institute for Human Development the Free University of Berlin and the Humboldt University Berlin

theoretical approaches and new empirical findings from ongoing studies conducted by leading researchers in North America and Europe It is unique in focussing on successful personality development where developmental psychology in the past seems to have focussed almost entirely on problem behaviour and risk of maladaptation The book has a multidisciplinary appeal and will be of interest to students and researchers in the fields of developmental psychology adult development and aging and personality and social psychology

Risk and Protective Factors in Schizophrenia Heinz Häfner, 2012-12-06
H HAFNER Schizophrenia Research Unit Central Institute of Mental Health Mannheim Germany The present volume contains the lectures and invited discussions of the symposium on Risk and protective factors in schizophrenia towards a conceptual model of the disease process which was held at the International Science Forum of the University of Heidelberg from October 25 to 27 2001 They are supplemented by a Summary and outlook in which Peter Jones gives a brief overview of the results and perspectives featured in the presentations and discussions The contributions and discussions reflect the open minded and creative atmosphere at the meeting The systematically structured program of the symposium continued the tradition of the Search for the Causes of Schizophrenia symposia which were first started in 1986 on the occasion of the 600 anniversary of the University of Heidelberg and which are co organized with Prof Wagner Farid Gattaz Sao Paulo The aim of these symposia and their proceedings volumes 6 8 10 has been to reflect the state of the art in schizophrenia research at their time and they have successfully done so In contrast the present symposium pursued a more limited objective and was of a different type It brought together around a large table at the International Science Forum in Heidelberg 22 invited speakers and discussants and an equal number of young scientists working in the research fields in question who were thus given an opportunity to listen and to participate

Human Development from Early Childhood to Early Adulthood Wolfgang Schneider, Merry Bullock, 2010-10-18 Data generated from longitudinal studies allow researchers to better understand how context and experience interact with stable characteristics of the developing person over time This book summarizes a landmark longitudinal study of 200 children from the ages of 3 to 23 The Munich Longitudinal Study on the Ontogenesis of Individual Competencies LOGIC examined the development of individual differences over time and whether it is possible to predict later competencies from earlier ones Offering a snapshot of theory and data on personality social motor moral and cognitive development the contributors help us understand which individual differences can and cannot be altered through schooling and other experiences and how differences seen in the earliest stages are later reflected in adulthood The results provide valuable insight into the strengths and limitations of early prediction of individual differences This is the second volume to review the wealth of data generated by the study The first volume Weinert and Schneider 1999 traced development from ages 3 to 12 This volume continues the story integrating these early findings with the results from adolescence and young adulthood Each of the chapters provides an overview of current research and addresses how the data help us understand the presence and developmental effects of individual differences Among the findings are results on The

relative stability of cognitive competencies The long term effects of shyness and aggression The relation between moral understanding and action and The role of education in the development or maintenance of performance differences Intended for researchers and advanced students in developmental educational personality social and cognitive psychology this book will also appeal to educators especially the chapters that focus on literacy development educational context scientific reasoning and mathematical reasoning *Developmental Research Methods* Scott A. Miller,2017-02-14 The Fifth Edition of the classic *Developmental Research Methods* presents an overview of methods to prepare students to carry out report on and evaluate research on human development across the lifespan The book explores every step in the research process from the initial concept to the final written product covering conceptual issues of experimental design as well as the procedural skills necessary to translate design into research Incorporating new topics pedagogy and references this edition conveys an appreciation of the issues that must be addressed the decisions that must be made and the obstacles that must be overcome at every phase in a research project capturing both the excitement and the challenge of doing quality research on topics that matter Storylines Elliot G. Mishler,2009-07-01 What do we mean when we refer to our identity and how do we represent it in the stories we tell about our lives Is identity a sustained private core or does it change as circumstances and relationships shift Mishler explores these questions through analyses of in depth interviews with five craftartists
