Language Teaching Britta Viebrock, 2016-07-11 Feature Films in English Language Teaching deals with the use of motion pictures in the advanced EFL English as a foreign language classroom. It provides a general introduction to film literacy and explains the rationale, methods and objectives of working with feature films. In addition, the book contains in-depth considerations on sixteen selected films which are grouped regionally: Australia, New Zealand, South Africa, USA, Great Britain. Each chapter describes the topical focus of the film and its central theme and provides background information on social, historical, political and geographical issues. A profound analysis of selected scenes lays the foundation for considerations on the teaching potential of the film. In a download section, the chapters are complemented with ready-to-use teaching materials on film-specific aspects: narrative, dramatic and cinematographic dimensions, which are organised as pre-while-post-viewing activities. A glossary on technical terms for film analysis completes the volume.

Reader's Guide to American History Peter J. Parish, 2013-06-17 There are so many books on so many aspects of the history of the United States offering such a wide variety of interpretations that students, teachers, scholars and librarians often need help and advice on how to find what they want. The Reader's Guide to American History is designed to meet that need by adopting a new and constructive approach to the appreciation of this rich historiography. Each of the 600 entries on topics in political, social and economic history describes and evaluates some 6 to 12 books on the topic, providing guidance to the reader on everything from broad surveys and interpretive works to specialized monographs. The entries are devoted to events and individuals as well as broader themes and are written by a team of well over 200 contributors, all scholars of American history.

Resources in Education, 1996-06 *Whitaker's Books in Print*, 1998 **California Dreaming** Suzanne M. Wilson, 2008-10-01 This compelling book tells the history of the past two decades of efforts to reform mathematics education in California. That history is a contentious one, full of such fervor and heat that participants and observers often refer to the math wars. Suzanne M. Wilson considers the many perspectives of those involved in math reform, weaving a tapestry of facts, philosophies, conversations, events and personalities into a vivid narrative. While her focus is on California, the implications of her book extend to struggles over education policy and practice throughout the United States. Wilson's three-dimensional account of math education reform efforts reveals how the debates tend to be deeply ideological and how people come to feel misunderstood and misrepresented. She examines the myths used to explain the failure of reforms, the actual reasons for failure and the importance of taking multiple perspectives into account when planning and implementing reform.
