Case Studies In Educational Change David Carter,2012-10-12 This text the second in a two volume set examining the process of educational reform describes case studies on the change process of education as it impacts on the individual at work The

authors provide interesting comparisons of similar changes occurring within education in different national settings including Australia New Zealand Israel the USA and the UK The case studies are based on three themes systematic change the transition from policy to practice and curriculum contexts The effects of governmental control over the curriculum and attempts to reform education by legislation are explained and the similarities are seen as marginalisation of professional educators corporatisation of education systems instrumentalisation of curriculum and the inability of those in power to draw from past knowledge on educational change Written to stand alone this book can also be read in conjunction with volume 1 International Perspectives on Educational Reform and Policy Implementation which examines the historical social and economic influences on education policy reform The authors argue that change takes a predictable format and once understood can be directed and managed The books are intended to be of interest to all involved in the planning and implementation of change together pointing the way to effective management of such change processes *Routledge Library Editions: Special Educational Needs* Various,2021-07-29 This set of 62 volumes originally published between 1951 and 1999 amalgamates a wide breadth of literature on Special Educational Needs with a particular focus on inclusivity class management and curriculum theory This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time and will be of particular interest to students of Education and those undertaking teaching qualifications *Improving Children's Learning* Joan Dean,2003-09-02 How can teachers improve what they do in the primary classroom Which teaching methods will help you and your pupils to perform effectively These are the questions that every teacher will be asking him or herself in today s climate of targets and tables Much research over recent years has focused on the role of the teacher and how effective classroom practice is achieved The book discusses many areas of topical importance including teaching methods motivating learners and matching work to children how to structure children s learning classroom control and organisation teaching literacy teaching children with special education needs working with parents It also looks at the increasing role of the teacher as a researcher and how collaborative practices are providing a way for teachers to appraise both their own progress and that of their colleagues This book should be of particular interest to the classroom teacher who is looking for ways to develop his or her teaching but has limited time to explore the research It sets out to translate the findings of research into practical terms which teachers can easily use **Readings for Reflective Teaching in the Primary School** Andrew Pollard,1996 **School Leadership** Professor Gerald Grace,Gerald Grace,2005-08-31 This text examines the ways in which concepts of educational leadership and management have evolved historically and culturally and reviews contemporary debates about school leadership Theoretical context is illuminated by the research of 88 headteachers of English primary and secondary schools *Crisis in the Primary Classroom* Maurice Galton,2021-12-24 First published in 1995 *Crisis in the Primary Classroom* redefines the crisis plaguing primary classrooms by challenging many of the educational and political orthodoxies of the nineties The book

is set during a particular period in the nineties when primary education was under attack from the Government and sections of the media with accusations that reading standards had fallen the National Curriculum was not being taught well and training colleges had failed to produce sufficient teachers of quality In response to these concerns the Government commissioned a report which presented a series of solutions Maurice Galton argues that the report failed to identify the root causes of the problems facing primary schools He examines critically whether the National Curriculum was necessary and whether teaching methods and classroom organization really needed to be changed radically He also addresses the issue of quality among teachers suggesting ways in which this might be developed Crisis in the Primary Classroom deserves to be read by all concerned with the planning administration and practice of primary education Teachers will be encouraged by the message that methods found to be successful in the past must be accommodated in new patterns of organization and classroom practice
