Looking Backward A Critical Appraisal Of Communitarian Thought:

Looking Backward Derek L. Phillips, 2014-07-14 When social reformers blame the current ills of Western culture on the loss of community they often evoke an ideal past in which societies were characterized by shared values respect for tradition commitment to the common good and similar attributes Communitarians assert that community was prominent in the past and argue that reclaiming the role community formerly played is necessary to counter the negative effects of individualism and liberal thinking Considering the relevance of community for our moral and political life today Derek Phillips offers the first thorough critique of the historical often nostalgic claims that underlie dominant versions of communitarian philosophy Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Instruction pour le Bureau d'expéditions du Conseil du Gouvernement-général des Pays-Bas, 1787* Alasdair MacIntyre's Views and Biological Ethics Sherel Jeevan Joseph Mendonsa, 2022-11-29 Some of the most fundamental questions which moral philosophers have been grappling with include What makes us moral beings Is morality a product of culture or nature or both Are ethical norms and principles universal and unchanging or are they relative being rooted in specific socio political and historical contexts Can ethical conclusions be derived from descriptive statements This book addresses these and similar questions through a comparative study between Alasdair MacIntyre's views and biological ethics It discusses how both MacIntyre's views and biological ethics highlight the importance of human biology for human morality Based on this discussion the book proposes that both the rational and the biological including the emotional dimensions of humans have to be considered in order to understand the complex and multi layered phenomenon of human morality As such it will prove to be a valuable resource for undergraduate and postgraduate students of moral philosophy especially those interested in studying the biological approach toward ethics Thomistic Aristotelian ethics and metaethics

Miki Kiyoshi 1897-1945 Susan Townsend, 2009-06-15 This book takes us on a fascinating journey through the world of thought of Miki Kiyoshi one of Japan's pre eminent philosophers before the Pacific War and thus makes us discover the man behind the philosopher His collaboration with government think tanks in the late 1930s has made him highly controversial in historiographical debates His death in prison six weeks after Japan's defeat hastened the lifting of pre war restrictions on civil rights in Japan He was a prolific diverse and original thinker revered by the Japanese as a plain speaking deeply humanistic philosopher who connected with the real lives of the people As a

The clamour of nationalism Sivamohan Valluvan, 2019-07-26 Nationalism has reasserted itself today as the political force of our times remaking European politics wherever one looks Britain is no exception and in the midst of Brexit it has even become a vanguard of nationalism's confident return to the mainstream Intellectual attempts to account for nationalism's resurgence have however floundered Desperately trying to read nationalism through one overarching cause as capitalist crisis as cultural backlash or as social media led anti Establishment politics these accounts have proven woefully inadequate This book argues that the only way to understand nationalism is through nationalism itself To understand it as the key force of modernity that calls upon all existing ideological traditions in asserting its appeal whether it is liberal conservative neoliberal or left wing This ideological clamour that characterises today's British nationalism requires both recognition and theorisation A meaningful understanding of new nationalism must reckon with the ideological range animating it and the deeply hostile aversion to different racial minorities that pervades its respective ideologies Drawing on a variety of cultural and political themes ranging from Corbyn's dithering the cult of Churchillism the neoliberal fixation with a point system immigration policy the muscular secularism of Richard Dawkins and friends fears that the white working class have become black and even simply the strange appeal of Harry Potter and Game of Thrones this book provides a dazzling but always detailed study of how nationalism is the politics of today only because it is a politics of everything

Second International Handbook of Educational Leadership

and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development
