White Drug Cultures and Regulation in London, 1916-1960 Christopher Hallam, 2018-08-09 This book traces the history of the London white drugs opiate and cocaine subculture from the First World War to the end of the classic British System of drug prescribing in the 1960s It also examines the regulatory forces that tried to suppress non medical drug use in both their medical and juridical forms Drugs subcultures were previously thought to have begun as part of the post war youth culture but in fact they existed from at least the 1930s In this book two networks of drug users are explored one emerging from the disaffected youth of the aristocracy the other from the night time economy of London's West End Their drug use was caught up in a kind of dance whose steps represented cultural conflicts over identity and the modernism and Victorianism that coexisted in interwar Britain

History of British Neurology Frank Clifford Rose, 2012 HISTORY OF BRITISH NEUROLOGY by F Clifford Rose Imperial College School of Medicine UK Diseases of the nervous system are a relatively small but vitally important part of medicine There was no scientific basis for diagnosis or treatment until the seventeenth century when Dr Thomas Willis 1621-1675 and his team tackled anatomy by dissection of the nervous system physiology by animal experiments and pathology by post mortem analysis It was Willis who first used the word neurology and his team who were among the founders of the Royal Society included Christopher Wren who besides being famous as an architect of London's churches drew the first modern diagram of the human brain Developments in our knowledge of the nervous system in the following centuries and the unique importance of clinical neurology became globally recognised through the work of Whytt Heberden Hughlings Jackson Gowers and many others The work and discoveries of these eminent specialists were extended with the introduction of such neurosciences as neurophysiology neuropathology and neuro radiology and this is the first comprehensive account of a battle with the unknown by determined practitioners

Medical Practice in Modern England, 2003-01-01 Before World War II the great majority of practicing doctors in England and Wales were general practitioners They performed their own surgery and were accustomed to treating a wide variety of illnesses and symptoms Specialists were few in number tended to practice in large towns and were often associated with major hospitals But rapidly changing medical institutions and services in the twentieth century have compelled specialization even among more modest doctors and hospitals While medical specialization was not new for centuries physicians were

differentiated from surgeons twentieth century science and technology emphasized and accelerated this difference rapidly Medical care began to shift from services rendered by the general practitioner to the employment of those doctors with a special interest for example pathology neurology or cardiology Author Rosemary Stevens an expert in public health traces especially within the last two centuries the patterns of English medical practice institutions staffing and training and their influence on specialization the British National Health Service Act and post World War II developments Stevens discusses the ever relevant issues of income determination medical education and the future of the general practitioner in an age of specialization Along with its companion volume Medical Practice in Modern England is a book that will be of lasting value to scholars of medicine medical care organization economics and modern social history It is of special importance at a time of crisis in the health care systems of many European Societies A fine book Carefully constructed factual elaborately researched gracefully written George A Silver M D professor emeritus of epidemiology and public health Yale University Rosemary Stevens is professor emeritus of history and sociology of science at the University of Pennsylvania Educated at Oxford Yale and Manchester she has also taught at Yale University and Tulane University She is the author of American Medicine and the Public Interest and In Sickness and in Wealth American Hospitals in the Twentieth Century *Current Catalog* National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965 70
