Surveillance Susan Flynn,Antonia Mackay,2017-08-22 In a world of ubiquitous surveillance watching and being watched are the salient features of the lives depicted in many of our cultural productions This collection examines surveillance as it is portrayed in art literature film and popular culture and makes the connection between our sense of self and what is seen In our post panoptical world which purports to proffer freedom of movement technology notes our movements and habits at every turn Surveillance seeps out from businesses and power structures to blur the lines of security and confidentiality This unsettling loss of privacy plays out in contemporary narratives where the selves we create are troubled by surveillance This collection will appeal to scholars of media and cultural studies contemporary literature film and art and American studies

American Surveillance Anthony Gregory,2016-07-29 A nuanced history and analysis of intelligence gathering versus privacy rights **Configuring the Networked Self** Julie E. Cohen,2012-01-24 The legal and technical rules governing

flows of information are out of balance argues Julie E Cohen in this original analysis of information law and policy Flows of cultural and technical information are overly restricted while flows of personal information often are not restricted at all The author investigates the institutional forces shaping the emerging information society and the contradictions between those forces and the ways that people use information and information technologies in their everyday lives She then proposes legal principles to ensure that people have ample room for cultural and material participation as well as greater control over the boundary conditions that govern flows of information to from and about them Spaces of Governmentality Martina

Tazzioli,2014-11-24 Much work has been done on the causes and characteristics of the Arab Spring but relatively little research has examined the political and spatial consequences that have developed following the uprisings This book engages with the ways in which spaces in Southern Europe and Northern Africa have been negotiated and transformed by migrants in the wake of the uprisings showing that their struggles are a continuation of their political movement Drawing on an innovative countermapping approach based on radical cartography Martina Tazzioli illustrates the spatial upheavals caused by migration in the Mediterranean and the transformations created by migration controls applied by European nations With critical insight on the application of Foucault s concept of governmentality to migration studies exploration of a reconfigured theory of autonomy of migration and discussion of the politics of invisibility that underpins migration this book sheds new light on the enduring struggles that follow the Arab Spring **Opening the Black Box** Gavin Smith,2014-10-03 Closed

Circuit Television CCTV cameras are a prominent if increasingly familiar feature of urbanism They symbolize the faith that

spatial authorities place in technical interventions for the treatment of social problems CCTV was principally introduced to sterilize municipalities to govern conducts and to protect properties Vast expenditure has been committed to these technologies without a clear sense of how precisely they influence things CCTV cameras might appear inanimate but Opening the Black Box shows them to be vital mediums within relational circulations of supervision The book principally excavates the social relations entwining the everyday application of CCTV It takes the reader on a journey from living beneath the camera to working behind the lens Attention focuses on the labour exerted by camera operators as they source and process distanced spectacles These workers are paid to scan monitor screens in search of disorderly vistas visualizing stimuli according to its perceived riskiness and or allurements But the projection of this gaze can draw an unsettling reflection It can mean enduring behavioural extremities as an impotent witness It can also entail making spontaneous decisions that determine the course of justice Opening the Black Box therefore contemplates the seductive and traumatic dimensions of monitoring telemediated riskscape through the prism of camera circuitry It probes the positioning of camera operators as vicarious custodians of a precarious social order and engages their subjective experiences It reveals the work of watching to be an ambiguous practice as much about managing external disturbances on the street as managing internal disruptions in the self
