Witting, 2018-01-11 What happens when a corporate subsidiary or network company is unable to pay personal injury victims in full This book sets out to tackle the insolvent entity problem especially as it arises in cases of mass wrongdoing such as those involving asbestos exposure and defective pharmaceuticals After discussing the nature of corporate groups and networks from the perspectives of business history organisation studies and social theory the book assesses a range of rules and proposed rules for extending liability for personal injuries beyond insolvent entities New proposals are put forward for an exception to the rule of limited liability and for the development of a flexible new tort based on conspiracy that encompasses not only control based relationships but also horizontal coordination between companies The book concludes with a general discussion of lessons learned from debates about extended liability and provides guidelines for the development of new liability rules

Nonconformity has also made a profound contribution to debates about the role of the State to family life and education culture in general trade and industry the development of philanthropy and charity and the development of pacifism In this volume for the first time Nonconformity and the breadth of its activity come under the expert scrutiny of a host of recognised scholars The result is a detailed and fascinating account of a movement in church history that while currently in decline has made an indelible mark on social political economic and religious life of the two nations

Scared to Death Christopher Booker,Richard North,2020-08-06 Newly revised and updated in the light of COVID 19 For most of the latter part of the last century and the early part of this Britain has been assailed by a succession of scares from salmonella and eggs to BSE from the Millennium Bug to bird flu from DDT to passive smoking from asbestos to global warming These scares have become one of the most conspicuous and damaging features of our modern world so much so that as we entered the third decade of the new century our senses had become so blunted that we scarcely recognised the real thing for what it was until it arrived COVID 19 for which we were almost completely unprepared The authors analyse the crucial roles of the different factions who perpetrated the scares from the scientists who misread or manipulated the evidence to the media and lobbyists who eagerly promoted scares without regard to the consequences and the politicians and officials who came up with absurdly disproportionate responses leaving us to pay a colossal price In this updated edition Scared to Death not only presents a detailed account of the scares that have dominated our society for the past 50 years through all of which the authors lived but also examines the

background to the COVID 19 pandemic tracing our lack of preparedness to its roots and then assessing by way of contrast why this is the real thing as opposed to the succession of scares that we have experienced **Compensating Asbestos**

Victims Andrea Boggio,2016-05-23 This book traces the emergence and transformations of asbestos compensation to explore the wider issue of to what extent legal systems have converged in the era of globalization Examining the mechanism by which asbestos compensation is delivered in Belgium England Italy and the United States as well as the cultural forces and actors which contribute to its emergence and transformations the book advances our understanding of how law operates within cultural norms routines and institutional relations of capitalist societies With material gathered from 50 interviews and from primary and secondary sources the author considers law as a cultural phenomenon national styles of legal culture and the convergence and divergence of legal cultures and law as a form of institutionalized power *Defending the*

Indefensible Jock McCulloch,Geoffrey Tweedale,2008-07-24 In the early twentieth century asbestos had a reputation as a lifesaver In 1960 however it became known that even relatively brief exposure to asbestos can cause mesothelioma a virulent and lethal cancer Yet the bulk of the world s asbestos was mined after 1960 Asbestos usage in many countries continued unabated This is the first global history of how the asbestos industry and its allies in government insurance and medicine defended the product throughout the twentieth century It explains how mining and manufacture could continue despite overwhelming medical evidence as to the risks The argument advanced in this book is that asbestos has proved so enduring because the industry was able to mount a successful defense strategy for the mineral a strategy that still operates in some parts of the world This defence involved the shaping of the public debate by censoring and sometimes corrupting scientific research nurturing scientific uncertainty and using allies in government insurance and medicine The book also discusses the problems of asbestos in the environment compensating victims and the continued use of asbestos in the developing world Its global focus shows how asbestos can be seen as a model for many occupational diseases indeed for a whole range of hazards produced by industrial societies The book is based on a wealth of documentary material gained from legal discovery supplemented by evidence from the authors visits and researches in the US the UK Canada Kazakhstan Zimbabwe Australia Swaziland and South Africa *Handbook of Recycled Concrete and Demolition Waste* F.
