Sayer,2021-05-30 This informative illustrated guide to the British Railways locomotive series covers its full production lifespan from 1962 1965 In the early 1960s the Bo Bo diesel electric locomotive known as The Clayton was conceived as the new standard for British Railways superseding other Type 1 classes While the early classes suffered from poor driver visibility the Claytons were highly successful and popular with operating crews However the largely untested high speed flat Paxman engines proved to be highly problematic As a result the Claytons were eventually withdrawn from BR service by December 1971 Anthony Sayer draws on considerable amounts of archive material to tell the full story of these Standard Type 1 locomotives and the issues surrounding their rise and fall Further sources provide insights into the effort and money expended on the Claytons in a desperate attempt to improve their reliability Supported by over 280 photographs and diagrams dramatic new insights into this troubled class have been assembled for both historians and modelers alike **British Rail Main Line Electric**

The Complete Encyclopedia of Locomotives Mirco De Cet, Alan Kent, 2006 Just like today with high specification computers being used to design even higher specification models for the next generation the making of machines to make machines was one of the most important aspects of the Industrial Revolution The lathe for example is the oldest known machine tool and dates back to antiquity but it wasn't until the late 17th century that such industries as clock making the building of scientific instruments furniture and gun makers began to convert from woodworking lathes to ones that were capable of machining metal Craftsmen needed precise machines that could shape metal gears cut metal screws and stamp shapes out of metal thus enabling others to assemble their products

Industrial Policy in Britain 1945-1951 Martin Chick, 2002-04-30 This is a detailed archive based study of the economic planning of the Attlee governments in which the author seeks to analyse the interaction between the decisions of central planners and the micro economic effects of these decisions Throughout the book Martin Chick pays particular attention to the level pattern and quality of fixed capital investment At the same time there is a continuous concern with the struggle between politicians economists and industrialists over the mix of pricing mechanisms and administrative orders which were to be used in this period This struggle permeated all discussions over matters such as the organisation of nationalised industries the monopoly structure of nationalised industries the allocation of resources and the promotion of higher productivity The author also asks what impact if any economic planning had on the productivity performance of the UK economy

English Electric Type 2 Bo-Bo 'Baby Deltic' Locomotives Anthony P Sayer, 2025-03-30 The British Railways Pilot Scheme orders of 1955 included ten English Electric Type 2 diesel electric locomotives deploying Napier Deltic engines These locomotives more colloquially known as the Baby Deltics were introduced into traffic during 1959 for use on the Eastern Region of British Railways This book looks at the history of the Class 23s making extensive use of available but previously unpublished archive material covering their introduction technical idiosyncrasies appearance design and performance Issues with the original Deltic engines were ultimately dealt with via a major rehabilitation exercise during the 1963-65 period whilst various re-engining options were considered including a new U series English Electric high speed engine design the original Napier engines were ultimately retained The work involved in the whole rehabilitation process is discussed in detail using internal English Electric archive material and forms a central focus of research The fleet survived intact until 1968 when withdrawal commenced as a direct result of declining traffic levels across the UK with successive National Traction Plans progressively selecting the less successful non standard and numerically challenged classes for removal from traffic All ten locomotives were withdrawn by March 1971 Individual locomotive histories allocations fire and accident incidents liveries and detail differences storage and disposals are provided for each locomotive

The BTH and North British Type 1 Bo-Bo Diesel-Electric Locomotives - British Railways Classes 15 and 16 Anthony P. Sayer, 2021-12-30 The British Railways Pilot Scheme orders of 1955 included ten BTH and ten NBL Type 1 locomotives these being introduced during 1957-61 for use in East London and on the Great

Eastern and London Tilbury Southend lines The BTH fleet subsequently expanded to forty four as a consequence of their light axle loading and the availability of spare manufacturing capacity which BR chose to exploit in their quest to eliminate steam traction Further construction of these two classes ceased after the fifty four units with preference being given to the highly reliable English Electric product which by mid 1962 had proliferated to 128 examples The NBL fleet survived until 1968 being withdrawn after ten years of indifferent performance The BTH locomotives followed by 1971 although four lingered on as carriage pre heating units Dramatic reductions in goods traffic during the 1960s 70s particularly impacted local trip and transfer freight duties the bread and butter work for the Type 1s and it was inevitable that the less successful classes were retired from traffic first This book looks at the short history of these two classes making extensive use of archive sources combined with the primary observations of numerous enthusiasts Previously unpublished information covering the introduction appearance design and performance issues of the locomotives form a central focus and allocations works histories storage and disposals liveries and detail differences are covered in the same level of detail as previous volumes in the Locomotive Portfolio series The Rural Transport Problem David St John Thomas,2021-05-11 Originally published in 1963 this book was the first to survey the rural transport problem as a whole and it includes the results of extensive research in an important but until then neglected field The issues of increased car ownership and the reduction of train and bus services and the social impact of this is discussed as well the question of subsidies in the UK as a whole Three area specific studies deal with the Lake District Northumberland and Devon Seventy Years of Railway Photography Colin Boocock,2018-03-30 Colin Boococks railway photographs are already familiar as they have been featured in a variety of railway books and magazines This book shows around 300 of his favorite images that illustrate the many different aspects of railway photography The key seven chapters in this book each cover one decade from the 1940s up to the present day Not only do they display the early improvement in his photography as he gained experience they also bring into focus how much railways have changed over the last seventy years Grimy steam locomotives in smoky surroundings persisted in ever reducing pockets as more modern forms of traction spread across our railways Working steam finally disappeared from UK main lines in 1968 and around coal mines in the mid 1980s The later chapters benefit greatly from Colins worldwide travels in which he searched for more unfamiliar railways The growth of heritage railways also features Useful appendices add insights into Colins experience of camera technologies and photographic techniques These emphasize the changes that have faced him as his photography has moved from black and white to color and from films and darkrooms to the computer and the digital age Colin last used film in early 2004 having embraced digital photography with enthusiasm **An Encyclopedia of the History of Technology** Ian McNeil,2002-06-01 22 sections cover the entire field of the history of technology and each section summarises the development of its subject from the earliest times to the present day Written without unnecessary jargon 2 extensive indexes of Names and Topics Usefully illustrated with 150 black white photographs and line
