Historical Dictionary of the League of Nations Anique H.M. van Ginneken, 2006-01-16 Created in 1919 shortly after World War I the League of Nations was principally designed to put an end to war But it went into hibernation when World War II broke out

and was formally wound up in 1946 Not having achieved its primary objective it was deemed a failure However the many accomplishments it did realize certainly allows for arguments against this idea During its two decade existence the League of Nations resolved and defused many conflicts and crises as well as established a rapport among its members It was also active in many other political social and technical fields including minorities refugees human rights labor health telecommunications and supervision of former colonial territories which had become mandates Above all the League of Nations proved to be training ground for the United Nations and the countless other organizations both governmental and non governmental which now surround us Just what the League of Nations was able to do during its brief but hectic career is summed up in this book The dictionary section contains several hundred cross referenced entries on its founders and supporters its rather small staff and secretariat the various subordinate or related organizations and their overwhelming tasks The historical background is described in the introduction and plotted year by year in the chronology while the bibliography points to further reading

Regions in Europe Patrick Le Gales, Christian Lequesne, 2006-02-27 Regions in Europe explores the state of regional politics in an increasingly integrated Europe It argues that the predicted rise of increased political power at the regional level has failed to materialise and is fraught with paradox In doing so this study locates regions in relation to European integration globalisation the nation state local government and comparative and national perspectives Using case studies of the main players in Europe including Germany France UK Italy Spain the Netherlands Belgium the contributors show how and why European regions remain remarkably weak in European governance

Great Powers' Foreign Policy, 2022-12-19 By comparing the great powers foreign policy this book investigates the global competition and revisionist attempts to dismantle the Western liberal order Since February 2022 the international system has been challenged by the Russian invasion in Ukraine and its profound multiple consequences Putin's War has reinvented the West But still this is not the end of history To illustrate that tensions between democratic and autocratic great powers are nowadays at their peak since the end of the Cold War one should consider President Biden's words in Warsaw referring to President Putin For God's sake this man cannot remain in power

the older and more formal UN Security Council to assess where the diplomacy of international security is taking place and whether these institutions complement or compete with each other Engelbrekt's research in primary source documents of the G7 G8 G20 and UN Security Council provides unique insight into how these institutions deliberate on three policy areas conflict management counterterrorism cooperation and climate change mitigation Relatively informal and flexible GX diplomacy invites more countries to take a seat at the table and allows nontraditional security threats to be placed on the agenda Engelbrekt concludes however that there is a continuing need for institutions like the UN to address traditional security problems High Table Diplomacy will provoke discussion and further research on the role of minilateral summits among scholars of international relations security studies and international organizations
