Leontiades, 1985-01-01 To learn more about Rowman Littlefield titles please visit us at www.rowmanlittlefield.com The Making of Global Enterprises Geoffrey Jones, 2020-07-24 This volume provides new insights to the history of international business The international group of authors drawn from the United States Canada Britain and Japan address two main themes How has global business developed over the last century And what has been its impact on host economies These original and wide ranging essays prefaced by an extensive editorial introduction are required reading in courses on international business **Global Economic Trends and Their Impact to Corporate Development** Frank Bezjak, 2010 Without a doubt Global Economic Trends have sustainably changed today's economic and socioeconomic landscape and the transformational power of GETs will drive industries and markets to a new secular destination However there are substantial uncertainties over future economic growth arising from the complex interplay of domestic and global determinants including such diverse factors as demographics advances in technology capital availability scarcity of resources domestic policies and global trade regimes environmental policies and financial regulations Aligning the right information to successfully plan and to implement management principles is challenging to corporations especially when addressing resource and investment decisions Therefore corporations need to establish organizational measures to incorporate the risks associated to GETs into the strategic management process and to avoid harm to the corporate portfolio The scientific contribution of this thesis is a tool called GET assessment framework which can be applied within strategic business planning to tackle risks associated to GETs The intent of the tool is to analyze the impact of a trend to the actual business situation of the corporation and to help the management to formulate and to establish counter measures within a scenario planning To prove its applicability the GET scarcity of resources is used to demonstrate how the shortage of oil is affecting a virtual corporation that is operating within the chemical industry which is a recent problem to business planning in the industry Using the concept of corporate evaluation which is introduced within the assessment framework potential risks are identified By this means external risks are mapped to the internal environment of the corporation and countermeasures are developed Business Strategy in a Semiglobal Economy Panos Mourdoukoutas, 2015-03-26 This groundbreaking text provides both theory and strategy for operating in a semiglobal economy in which international businesses must compete in highly globalized and highly localized markets at the same time Unlike the traditional transnational and matrix corporate models a semiglobal corporation organizes its operations according to the global local content of its value propositions rather than according to geographical regions products or contribution to the parent company's performance As an example of a semiglobal corporation the Honda Motor Company has a global vision when it comes to highly global bundles like car engines and a local vision when it comes to highly localized car financing and servicing Designed as a supplementary text for courses in international business development economics marketing and
